The Law of the Sea Aug 19 2019 The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994. Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea. New concepts, such as the exclusive economic zone, archipelagic waters, transit passage through straits, and the International Seabed Area, are now fully recognized. The fifteen member States of the European Union are a significant sample for analyzing the practice of States, or at least that of the Western industrialized States, as regards the law of the sea. They include major and small maritime powers, coastal and land-locked States, States with coasts on the Atlantic Ocean and States with coasts on semi-enclosed seas such as the Baltic and the Mediterranean, States with and without involvement in deep seabed mining and States with different interests as regards fisheries. The fact that they all belong to the European Union is a very important common feature, which amply justifies the choice made to study them together. The book's aim is to give, through essays prepared by well-known specialists, a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such. The common positions of the member States and the results of their coordinated action also emerge from these essays. The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument, or at least as an instrument widely ratified by States of all continents and economic and political interests.

A.W. Tozer Bible-KJV Aug 11 2021 " The Word of God well understood and religiously obeyed is the shortest route to spiritual perfection. Nothing less than a whole Bible can make a whole Christian. A. W. Tozer " "Key writings of one of the twentieth century s most profound Christian authors are married with the scriptures that A. W. Tozer loved, studied and wrote about over the course of his forty year ministry. "> Hendrickson Publishers is proud to introduce the A. W. Tozer Bible, which will introduce a whole generation of readers to his work. Tozer (1897 1963), an pastor, preacher, student and teacher, is perhaps the closest American writer to C. S. Lewis, with the same penetrating insights and straightforward use of language. His bracing words, which accompany related passages throughout this Bible, unlock many of the mysteries of the Scriptures in language that could have been written today. This unique volume features over 500 key selections and teachings, taken from more than 40 of Tozer s writings, ranging from seminal bestselling books like "The Pursuit of God" and "The Attributes of God" to lesser-known works such as *The Size of the Soul* and *The Root of the Righteous*. Each selection appears in one of three categories: **On Scripture** Over 365 selections, each sharing the page with the Bible passage to which it refers, add depth and insight to a particular verse s application for the believer. **Reflections** More than 100 writings that apply the deep meaning of the Christian faith to everyday life. **Challenges** Nearly 100 entries, tied to scripture, that exhort the reader to resist complacency in particular areas of one s living out the Word in the world. **Special Features** Brief biography of A. W. Tozer Over 500 Tozer selections Book introductions Words of Christ in red Concordance Maps "

Unknown Lutsk Karaim Letters in Hebrew Script (19th-20th Centuries) Mar 26 2020 The work presents -- as far as is now possible -- the language spoken by Lutsk Karaims in the second half of the 19th and in the first two decades of the 20th centuries. This is attempted by means of editing eleven private letters and five open letters written in Lutsk Karaim -- with Hebrew interpolations. The letters were written by different authors in Hebrew script. The present publication appears to be the first critical edition of this type of text written in this particular dialect. Previous editions of south-western Karaim manuscripts either concerned very short texts from Halych or were prepared with no intention of being professional. The linguistic description of the texts aims to present a grammar of the manuscripts' language. It is complemented with a separate chapter dealing with the Slavonic structural influences exerted on the authors' idiolects, and with the lexicon of the texts. A separate part deals with the orthography and the features of the writing itself. The transcription and translation of each manuscript are preceded with a concise palaeographic description and a summary of the content. The work closes with a glossary, several indexes, maps, and the facsimile of the manuscripts.
