*Fields and Streams* Jul 18 2021 Examining the science of stream restoration, Rebecca Lave argues that the neoliberal emphasis on the privatization and commercialization of knowledge has fundamentally changed the way that science is funded, organized, and viewed in the United States. Stream restoration science and practice is in a startling state. The most widely respected expert in the field, Dave Rosgen, is a private consultant with relatively little formal scientific training. Since the mid-1990s, many academic and federal agency-based scientists have denounced Rosgen as a charlatan and a hack. Despite this, Rosgen's Natural Channel Design approach, classification system, and short-course series are not only accepted but are viewed as more legitimate than academically produced knowledge and training. Rosgen's methods are now promoted by federal agencies including the Environmental Protection Agency, the U.S. Forest Service, the U.S. Fish and Wildlife Service, and the Natural Resources Conservation Service, as well as by resource agencies in dozens of states. Drawing on the work of Pierre Bourdieu, Lave demonstrates that the primary cause of Rosgen's success is neither the method nor the man but is instead the assignment of a new legitimacy to scientific claims developed outside the academy, concurrent with academic scientists' decreasing ability to defend their turf. What is at stake in the Rosgen wars, argues Lave, is not just the ecological health of our rivers and streams but the very future of environmental science.

**The Right Place** Mar 14 2021 Public facilities provide important goods and services which contribute to and enhance the quality of life. The search for appropriate locations for these facilities attracts attention from academics, politicians, bureaucrats and the general public. The process by which locations are selected is therefore one of collective choice drawing together technical information on aspects such as needs assessment, performance measurement and estimates of environmental, social and economic impacts. Of equal importance are the attitudes preferences and perceptions of the decision makers, managers and end users. *The Right Place* provides a critical review of contemporary approaches used to address locational issues and problems of public facilities; such facilities include noxious waste dumps, recycling depots and power stations, as well as more welcome schools, hospitals and parks. Fundamental concepts such as choice, consensus and accountability which underlie the search process are identified and discussed, and the author highlights the important relationships between public facilities, welfare and planning to provide an introduction to the book. Throughout the text the concept of shared responsibility provides a framework for drawing together the diverse range of literature used in this study. Findings from the social sciences and appropriate areas of operational research are used to investigate and discuss how the siting of public facilities can be improved in terms of service productivity and efficiency while still addressing the requirements of equity and economy. The author looks at the style of regulatory government that is emerging and its effect on the decision making process and discusses in some detail the impact of information technology on the planning process and political and bureaucratic procedures. This technology includes computer-based decision support systems and multi-criteria decision aid models; several of these are discussed in detail. *The Right Place* will aid readers to identify the fundamental principles and approaches relating to complex locational problems and will assist them to develop procedures that will minimize planning errors. Case studies, drawn from a variety of countries, are used to illustrate the arguments. *The Right Place* is written for senior undergraduates and postgraduate students in colleges, universities and polytechnics with an interest in planning, public policy and administration and political science. It will prove to be a valuable reference source for planners involved with waste management, highway engineering and social services and members of the regulatory agencies and government bodies who deal with the location of public facilities.

**THE GOVERNMENT PARASITE** Sep 07 2020 **THE GOVERNMENT PARASITE** A Tongue-in Cheek Boomer's Eyed View of History Whether personal or historical, beginnings are the most important part of stories, followed by how we got here

and now. The author introduces himself through his beginnings; "Growing Up in Fifties Philly" This is followed by the beginnings of the United States of America in Ancient Greece and the millennia leading to the conflict, struggle and the new governmental structure that became the United States. Jumping ahead 100 years, the roots of "The Progressives" and how they have changed the direction of the nation through Presidents like Teddy Roosevelt, Woodrow Wilson and F.D.R. What has the New Millennium brought for the author and the Nation? And, where do we go from here? A twist is applied with mostly humorous, cynical or alarmed author inserted observations. (sic)

**Adam Bede** Jun 16 2021 The seemingly peaceful country village of Hayslope is the setting for this ambitious first novel by one of the nineteenth century's great novelists. With sympathy, wit, and unflinching realism, Adam Bede tells a story that would have been familiar to Eliot's first readers: the seduction of a pretty farm girl by the young squire of the district. Eliot uses this story, with its tragic implications, to explore the dangers of reliance on religious and social norms to govern destructive desires. As this edition demonstrates, Adam Bede addresses profound questions of morality, religion, and the role of women in society, while at the same time seeking to establish a new aesthetic for fiction. This Broadview edition includes a critical introduction and a rich selection of appendices, including selections from Eliot's letters and journals, contemporary reviews of the novel, and accounts of the murder trial of Mary Voce, the woman whose story formed part of the inspiration for the novel.

Linear Algebra Done Right Jun 28 2022 This text for a second course in linear algebra, aimed at math majors and graduates, adopts a novel approach by banishing determinants to the end of the book and focusing on understanding the structure of linear operators on vector spaces. The author has taken unusual care to motivate concepts and to simplify proofs. For example, the book presents - without having defined determinants - a clean proof that every linear operator on a finite-dimensional complex vector space has an eigenvalue. The book starts by discussing vector spaces, linear independence, span, basics, and dimension. Students are introduced to inner-product spaces in the first half of the book and shortly thereafter to the finite-dimensional spectral theorem. A variety of interesting exercises in each chapter helps students understand and manipulate the objects of linear algebra. This second edition features new chapters on diagonal matrices, on linear functionals and adjoints, and on the spectral theorem; some sections, such as those on self-adjoint and normal operators, have been entirely rewritten; and hundreds of minor improvements have been made throughout the text.

Cases on Performance Improvement Innovation Jan 30 2020 Companies in today's market are continually looking for techniques that will enhance and improve their overall performance. The rise of data analytics in recent years has changed the way managers are viewing performance methods within an organization. Innovative strategies in developing organizational execution are becoming more accessible; however, there remains a lack of research on performance improvement methods through scientific analysis. Cases on Performance Improvement Innovation is a collection of innovative research that illustrates many applications of performance improvement based on analysis, selection of strategy, monitoring, and evaluating results to accomplish organizational change through people, processes, and organizations. While highlighting topics including intervention analysis, organizational development, and human performance technology, this book is ideally designed for students, researchers, executives, managers, practitioners, educators, and academicians seeking current research on contemporary innovations in organizational performance.

**Carlos Is Not Crazy!: The Perfect Solution to Preventing the Mass Shootings in our Schools!** Nov 02 2022 The mass shooting in Texas on Tuesday, May 24, 2022, that killed 19 children galvanized me into writing this children's book. It is my solution to the killing-children-in-their-schools problem. I am convinced it is the only solution that will work! It is written for and to the Children who were not killed in these egregious mass shootings who will live to adulthood so they can do what their parents and grandparents would not or could not do, which is to get the guns and stop the killing. Since the mass shooting in Texas involved 4th graders, I used a 4th grader named Carlos to get my message across, and since children are our future and will lead the way to solving this unfortunate problem of ours by changing America when they grow up, I used the children's book as the medium for my message. There will come a Tipping Point when the majority of Americans will want to get the guns and it will arrive when the friends of the children being killed today become Voters and Congressmen and Supreme Court Judges and President!

Blind Spot Nov 29 2019 The Voynich Manuscript has been considered to be the world's most mysterious book. Filled with strange illustrations and an unknown language, it challenged the world's top code-crackers for nearly a century. But in just four-and-a-half months, Dr. Gordon Rugg, a renowned researcher, found evidence (which had been there all along) that the book could be a giant, glittering hoax. In *Blind Spot: Why We Fail to See the Solution Right in Front of Us*, Dr. Rugg shares his story and shows how his toolkit of problem-solving techniques—such as his Verifier Method—can save the day, particularly in those times when the experts on your team have all the data in front of them but are still unaccountably at an impasse. In the tradition of Malcolm Gladwell and Dan Ariely, Dr. Rugg, a rising star in computer science, challenges us to re-examine the way we think, and provides new tools to solve problems and crack codes in our own lives.

The 7 Minute Solution Sep 19 2021 The best-selling author of *The 7 Minute Difference* demonstrates how small routine choices can enable significant positive changes in personal relationships and goals, outlining specific strategies and tools for identifying key priorities and accomplishing scheduled daily tasks.

**A Twist of Lyme** Dec 31 2019

When she moved to Barrington, Rhode Island, Andrea Caesar was an active, happy, vivacious ten-year-old who loved to play kickball and hang from the monkey bars. A year later, Andrea had trouble catching her breath while running, was plagued by migraines, and battled constant muscle aches. Andrea had changed as a person; she was the kid who was always missing school. Although she did not know it at the time, she had contracted *Borrelia burgdorferi*, better known as Lyme disease.

Caesar, who was finally diagnosed at age thirty-six, shares a raw and honest look inside the mind of a woman tormented by treatment in her pursuit of wellness. She chronicles her life from age eleven through her diagnosis and subsequent treatment, recalling her emotions as she struggled with Lyme, its symptoms, and multiple related infections—all while attempting to live a normal life. Driven by her determination to help others with the same affliction, Caesar provides details on what worked, what did not work, and why.

*A Twist of Lyme* shares the captivating, heart-wrenching story of a woman's decades-long battle with Lyme disease as she is led by perseverance, courage, and hope to an eventual diagnosis and treatment.

**The Right Answer** Jul 30 2022 The first declared candidate for president in 2020 delivers a passionate call for bipartisan action, entrepreneurial innovation, and a renewed commitment to the American idea The son of a union electrician and grandson of an immigrant, John K. Delaney grew up believing that anything was possible in America. Before he was fifty, he founded, built and then sold two companies worth billions of dollars. Driven by a deep desire to serve, in 2012 he stepped away from his businesses, ran for Congress, and won. Now he has a new mission: unifying our terribly divided nation and guiding it to a brighter future. As a boy, Delaney learned the importance of working hard, telling the truth and embracing compromise. As an entrepreneur, he succeeded because he understood the need to ensure opportunity for all, focus on the future, and think creatively about problem-solving. In these pages, he illustrates the potency of these principles with vivid stories from his childhood, his career in business, his family, and his new life as a politician. He also writes candidly about the often frustrating experience of working on Capitol Hill, where many of his colleagues care more about scoring political points than improving the lives of their fellow Americans. With a clear eye and an open heart, he explains that only by seeing both sides of an argument and releasing our inner entrepreneur can we get back to constructive, enlightened governing. Seventy years ago, John F. Kennedy appealed to our best instincts when he said, "Let us not seek the Republican answer or the Democratic answer but the right answer." In this inspiring book, John K. Delaney asks all of us to cast aside destructive, partisan thinking and join him in an urgent endeavor: working together to forge a new era of American greatness.
