Decompression Feb 01 2020 In this riveting tale we meet two couples caught in a web of conflicting passions, Diving instructor Sven Fiedler and his girlfriend, Antje, who live and work on the Spanish island of Lanzarote. When a tourist couple—Jola, a soap opera actress, and Theo, a stalled novelist—arrive for an intensive two-week diving experience, Sven is captivated by Jola's beauty and evident wealth. Theo suspects that Sven and Jola have begun an affair, but oddly, he seems to encourage them. Antje looks on, increasingly wary of these new clients. Cycling through different points of view, we are constantly kept guessing about who knows what—and who is telling the truth. A brutal game of temptation and manipulation unfolds, pointing toward a violent end—but a quiet one, underwater, beneath the waves.

[The Cult of Smart](#) Mar 16 2021 Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively:

Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

Proceedings Aug 21 2021 Vol. 12 includes under the same cover the society's year-book for 1912.

Budget Policy and Fiscal Risk Sep 29 2019 Critics often charge that the major revision of U.S. military strategy which took place after the collapse of the Soviet Union was budget-driven rather than strategy-driven. Partially in response to this, the current strategic review, led by Secretary of Defense Rumsfeld, is intended to be "strategy-driven." Even so, the defense budget remains one of the central shaping features of U.S. national security and national military strategy. To understand what is possible in terms of defense transformation, one must first have a firm grasp of the budgetary context of strategic decisions. In the monograph that follows, Dr. Dennis Ippolito, one of the leading experts on the American defense budget, assesses this context. He shows that defense will continue to compete with domestic programs for that portion of the budget allocated to discretionary spending, and argues that this is a competition in which defense needs have not fared especially well in the past and may not in the future.

[The Private Journal and Literary Remains of John Byrom, Volume 2;](#) Mar 04 2020 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge

alive and relevant.

Oil and Governance Dec 01 2019 National Oil Companies (NOCs) play an important role in the world economy. They produce most of the world's oil and bankroll governments across the globe. Although NOCs superficially resemble private-sector companies, they often behave in very different ways. Oil and Governance explains the variation in performance and strategy for NOCs and provides fresh insights into the future of the oil industry as well as the politics of the oil-rich countries where NOCs dominate. It comprises fifteen case studies, each following a common research design, of NOCs based in the Middle East, Africa, Asia, Latin America and Europe. The book also includes cross-cutting pieces on the industrial structure of the oil industry and the politics and administration of NOCs. This book is the largest and most systematic analysis of NOCs to date and is suitable for audiences from industry and academia, as well as policy makers.
