The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The Tepaphone, Magic Mirrors, Magic Dolls and Living Pictures Dec 31 2019 This book provides a deeper look into the magical use of the tepaphone,

magic mirrors, magical dolls and living pictures for the students of magic. In the legends of magic there are many stories of magical tools that were used by witches and wizards. The number of tools mentioned is vast and would fill the garage of any modern-day magician to the full. This book is part of the Franz Bardon series and the magical tools covered in it are those specifically referred to in detail by Franz Bardon. What makes the book special is that it also provides readers with insights to related practices as described by those who influenced Bardon or were his peers. The tepaphone is a magical instrument used to transmit magical vibrations over distances. Although feared for its use in magical attacks, this book indicates its potential use for healing and doing good. The book describes its working and construction in detail. The use of magic mirrors for purposes of ritual magic has, up to now, been scarcely recommended in books on magic, as initiates have kept it a great secret. It is a very powerful magical tool that Bardon used as a great instrument of communication and to "look in on friends". The use of magic dolls and magic pictures is a long lost art in magical circles and this book provides a unique description of their construction and use. Finally it is pointed out that the book emphasizes the fact that the use of these tools are dependent on the magical ability of its operator and creator. The book therefore contains the basic exercises needed to develop the required skills.
