Statistical Applications for the Behavioral and Social Sciences Jun 06 2020 An updated edition of a classic text on applying statistical analyses to the social sciences, with reviews, new chapters, an expanded set of post-hoc analyses, and information on computing in Excel and SPSS Now in its second edition, *Statistical Applications for the Behavioral and Social Sciences* has been revised and updated and continues to offer an essential guide to the conceptual foundations of statistical analyses (particularly inferential statistics), placing an emphasis on connecting statistical tools with appropriate research contexts. Designed to be accessible, the text contains an applications-oriented, step-by-step presentation of the statistical theories and formulas most often used by the social sciences. The revised text also includes an entire chapter on the basic concepts in research, presenting an overall context for all the book's statistical theories and formulas. The authors cover descriptive statistics and z scores, the theoretical underpinnings of inferential statistics, z and t tests, power analysis, one/two-way and repeated-measures ANOVA, linear correlation and regression, as well as chi-square and other nonparametric tests. The second edition also includes a new chapter on basic probability theory. This important resource: Contains information regarding the use of statistical software packages; both Excel and SPSS Offers four strategically positioned and accumulating reviews, each containing a set of research-oriented diagnostic questions designed to help students determine which tests are applicable to which research scenarios Incorporates additional statistical information on follow-up analyses such as post-hoc tests and effect sizes Includes a series of sidebar discussions dispersed throughout the text that address, among other topics, the recent and growing controversy regarding the failed reproducibility of published findings in the social sciences Puts renewed emphasis on presentation of data and findings using the APA format Includes supplementary material consisting of a set of "kick-start" quizzes designed to get students quickly back up to speed at the start of an instructional period, and a complete set of ready-to-use PowerPoint slides for in-class use Written for students in areas such as psychology, sociology, criminology, political science, public health, and others, *Statistical Applications for the Behavioral and Social Sciences, Second Edition* continues to provide the information needed to understand the foundations of statistical analyses as relevant to the behavioral and social sciences.

Brenner and Rector's The Kidney E-Book Oct 30 2019 Overcome the toughest clinical challenges in nephrology with Brenner & Rector's *The Kidney* -- the most well-known nephrology resource in the world. A diverse team of more than 200 international contributors brings you the latest knowledge and best practices on every front in nephrology worldwide. From basic science and pathophysiology to clinical best practices, Brenner & Rector's *The Kidney* is your go-to resource for any stage of your career. Review of the basic science that underpins clinical nephrology, comprehensive selection of the most important bibliographical sources in nephrology, and Board Review-style questions help you prepare for certification or recertification. Coverage of kidney health and disease from pre-conception through fetal and infant health, childhood, adulthood, and into old age. Expanded sections and chapter on global perspective and ethical considerations. Uniform terminology and nomenclature in line with emerging consensus in world kidney community. More than 700 full-color high-quality photographs as well as carefully chosen figures, algorithms, and tables to illustrate essential concepts, nuances of clinical presentation and technique, and decision making provide a visual grasp and better understanding of critical information. Internationally diverse, trusted guidance and perspectives from a team of well-respected global contributors. An editorial team headed by Dr. Skorecki and handpicked by Dr. Brenner ensures the ongoing adherence to previous standards of excellence. All chapters have been extensively updated or entirely rewritten by authorities in their respective fields. The latest clinical information including recent clinical trials, genetic causes of kidney disease, cardiovascular and renal risk prediction in chronic kidney disease, new paradigms in fluid and electrolyte management, and pediatric kidney disease, keep you current with the rapid development of care and research worldwide.

NCJRS Presents Fact-finding Service Sep 02 2022

Dose Finding by the Continual Reassessment Method Feb 12 2021 As clinicians begin to realize the important role of dose-finding in the drug development process, there is an increasing openness to "novel" methods proposed in the past two decades. In particular, the Continual Reassessment Method (CRM) and its variations have drawn much attention in the medical community, though it has yet to become a commonplace tool. To overcome the status quo in phase I clinical trials, statisticians must be able to design trials using the CRM in a timely and reproducible manner. A self-contained theoretical framework of the CRM for researchers and graduate students who set out to learn and do research in the CRM and dose-finding methods in general, *Dose Finding by the Continual Reassessment Method* features: Real clinical trial examples that illustrate the methods and techniques throughout the book Detailed calibration techniques that enable biostatisticians to design a CRM in timely manner Limitations of the CRM are outlined to aid in correct use of method This book supplies practical, efficient dose-finding methods based on cutting edge statistical research. More than just a cookbook, it provides full, unified coverage of the CRM in addition to step-by-step guidelines to automation and parameterization of the methods used on a regular basis. A detailed exposition of the calibration of the CRM for applied statisticians working with dose-finding in phase I trials, the book focuses on the R package 'dfcrm' for the CRM and its major variants. The author recognizes clinicians' skepticism of model-based designs, and addresses their concerns that the time, professional, and computational resources necessary for accurate model-based designs can be major bottlenecks to the widespread use of appropriate dose-finding methods in phase I practice. The

theoretically- and empirically-based methods in Dose Finding by the Continual Reassessment Method will lessen the statistician's burden and encourage the continuing development and implementation of model-based dose-finding methods.

No Time Like the Present Feb 24 2022 In this landmark work, internationally beloved teacher of meditation and "one of the great spiritual teachers of our time" (Alice Walker, author of *The Color Purple*) Jack Kornfield reveals that you can be instantly happy with the keys to inner freedom. Through his signature warmhearted, poignant, often funny stories, with their a-ha moments and O. Henry-like outcomes, Jack Kornfield shows how we can free ourselves, wherever we are and whatever our circumstances. Renowned for his mindfulness practices and meditations, Jack provides keys for opening gateways to immediate shifts in perspective and clarity of vision, allowing us to "grapple with difficult emotions" (Publishers Weekly, starred review) and know how to change course, take action, or—when we shouldn't act—just relax and trust. Each chapter presents a path to a different kind of freedom—freedom from fear, freedom to start over, to love, to be yourself, and to be happy—and guides you into an active process that engages your mind and heart, awakens your spirit, and brings real joy, over and over again. Drawing from his own life as a son, brother, father, and partner, and on his forty years of face-to-face teaching of thousands of people across the country, Jack presents "a consommé of goodness, heart, laughter, tears, and breath, nourishing and delicious" (Anne Lamott, author of *Bird by Bird*). His keys to life will help us find hope, clarity, relief from past disappointments and guilt, and the courage to go forward.

The New York Annotated Digest Aug 21 2021

States in Disguise Sep 29 2019 There is a long history of state governments providing support to nonstate armed groups fighting battles in other countries. Examples include Syria's aid to Hamas, Ecuador's support for FARC, and Libya's donation of arms to the IRA. What motivates states to do this? And why would rebel groups align themselves with these states? In *States in Disguise*, Belgin San-Akca builds a rigorous theoretical framework within which to study the complex and fluid network of relationships between states and rebel groups, including ethnic and religious insurgents, revolutionary groups, and terrorists. She proves that patterns of alliances between armed rebels and modern states are hardly coincidental, but the result of systematic and strategic choices made by both states and rebel groups. San-Akca demonstrates that these alliances are the result of shared conflictual, material and ideational interests, and her theory shows how to understand these ties via the domestic and international environment. Drawing from an original data set of 455 groups, their target states, and supporters over a span of more than sixty years, she explains that states are most likely to support rebel groups when they are confronted with internal and external threats simultaneously, while rebels select strong states and democracies when seeking outside support. She also shows that states and rebels look to align with one another when they share ethnic, religious and ideological ties. Through its broad chronological sweep, *States in Disguise* reveals how and why the phenomenon of state and rebel group alliances has evolved over time.

Finding Your Logical Presentation Flow Oct 03 2022 This is the eBook version of the printed book. This Element is an excerpt from *Presenting to Win: The Art of Telling Your Story, Updated and Expanded Edition* (ISBN: 9780137144174) by Jerry Weissman. Available in print and digital formats. Create a natural flow for your presentation: help your audience follow you smoothly, straight to your destination! When you brainstormed your presentation, you used right-brain focus. Now you're ready to shift to your left brain, and develop a logical flow. It's time to decide which cluster goes first, which goes in the middle, and which goes last. You need a clear path, a blueprint for sequencing your presentation's elements. You need flow.

EBOOK: Researching Criminology May 06 2020 "...what makes the book stand out is the inclusion of real research into various criminal justice institutions that have actually been undertaken by the authors. In doing so, what is produced is a book that stimulates interest and injects research passion, as well as offering research 'know how' into what can often be a difficult and sometimes dry area of research." Tina Patel, Liverpool John Moores University "This book provides an essential tool for undergraduate students embarking upon their own research projects in Criminology. It provides clear and informative guidance on a range of research methods and designs to assist students in their own criminological endeavours." Jacki Tapley, University of Portsmouth How do criminologists go about studying crime and its consequences? How are programmes for offenders and communities evaluated? How can you collect and analyse criminological material? Research on crime and criminality is often referred to by the media, policy makers and practitioners, but where does this research come from and how reliable is it? Designed especially for students on criminology and criminal justice courses, and professionals working in the field, *Researching Criminology* emphasises the importance of research as an integrated process. It looks at the ways in which a mixture of investigative methods can be used to analyze a criminological question. Written by two experienced researchers and lecturers *Researching Criminology* is a comprehensive introduction to the aims, principles and methods of doing criminological research. The book covers all the key topics that you will encounter when researching crime. Individual chapters include material on: The research process Principles of researching criminology How to design criminological research Evaluation research Researching ethically A glossary of essential key concepts Structured in three parts, addressing the principles of criminological research, how to collect and analyse material and providing detailed examples of real world research, *Researching Criminology* will be of benefit to all students of criminology and criminal justice, for practitioners interested in criminological research, and for those undertaking criminological research for the first time.

Audit Guide Apr 16 2021 This new edition provides up-to-date information and expert guidance on single audits and Uniform Guidance compliance audit requirements, including example auditor reports for both the financial statement audit and the Uniform Guidance compliance audit. It provides nonfederal entities receiving federal awards with important information on implementing the Uniform Guidance.

Just Plain Data Analysis Nov 04 2022 *Just Plain Data Analysis* is designed to teach students statistical literacy skills that they can use to evaluate and construct arguments about public affairs issues grounded in numerical evidence. With a new chapter on statistical fallacies and updates throughout the text, the new edition teaches students how to find, interpret, and present commonly used social indicators in an even clearer and more practical way.

Research for the Radiation Therapist Jul 28 2019 This book addresses a wide range of topics, from the principles of evidence-based practice to the process and dissemination of research to unique considerations such as clinical trials, patenting, and health services research. The case for evidence-based practice and a collaborative research culture is made first, followed by a series of chapters walking the reader through the research process by way of the scientific method. One of the more unique aspects of the scope of this book is the inclusion of chapters relating to the dissemination of knowledge, manuscript publication, and how to build an academic research program. Each chapter focuses on introducing the reader to foundational principles, methodology, and terminology, and highlight case studies of radiation therapist research or experience that is relevant to provide contextual examples and inspiration to the reader.

Academic Presenting and Presentations Jun 30 2022 Academic Presenting and Presentations (APP) is a research-based training course designed to help students cultivate academic presentation skills and deal with the various presentation tasks they may be expected to fulfil as part of their university or college studies. The material is suitable for a global audience and can be used in a wide range of contexts in the field of Communication Skills, English Language Teaching and English for Academic Purposes. The instructional and practice material included not only helps students to develop their presentation skills but also deals with broader topics of interest in a study-oriented context, such as research and plagiarism. The unique content emphasises higher level task-achievement rather than discrete language points, since experience shows that this is the area most students find especially difficult. Each unit of Academic Presenting and Presentations focuses on a different presentation genre, building the students' awareness of how to present effectively whilst at the same time focusing attention on the specific requirements of addressing an audience in an academic environment. The accompanying videos form an integral component of this course and consist of two types of presentation: Learning Presentations, which give advice to students, and Sample Presentations, which illustrate different types of presentation. The downloadable videos are included in the online support materials.
