From Birdwomen to Skygirls Jul 22 2022 Close on the heels of the American public's early enthusiasm over the airplane came aviation stories for the young. From 1910 until the early 1960s, they exalted flight and painted the airplane as the most modern and adventuresome of machines. Most of the books were directed at boys; however, a substantial number sought a girls' audience. Erismann's account of several aviation series and other aviation books for girls fills a gap in the history and criticism of American popular culture. It examines the stories of girls who took to the sky, of the sources where authors found their inspiration, and of the evolution of aviation as an enterprise open to all. From the heady days of early aviation through the glory days of commercial air travel, girls' aviation books trace American women's participation in the field. They also reflect changes in women's roles and status in American society as the sex sought greater equality with men. As aviation technology improved, the birdwomen of the pre-World War I era, capable and independent-minded, gave way to individualistic 1930s adventurers patterned on Amelia Earhart, Jacqueline Cochran, and other feminine notables of the air. Their stories lead directly into the coming of commercial air travel. Career stories paint the increasingly glamorous world of the 1940s and 1950s airline stewardess, the unspoken assumptions lying behind that profession, and the inexorable effects of technological and economic change. By recovering these largely forgotten books and the social debates surrounding women's flying, Erismann makes a substantial contribution to aviation history, women's history, and the study of juvenile literature. This first comprehensive study of a long-overlooked topic recalls aviation experiences long past and poses provocative questions about Americans' attitudes toward women and how those attitudes were conveyed to the young.

Essentials for Practice of Medicine in the Frontline Jul 30 2020 Essentials for practice of medicine in the frontline is an abridged synthesis of selected topics from family medicine, internal medicine, pediatrics, obstetrics and gynecology, pathology, and psychiatry; also, ophthalmology, otorhinolaryngology, hematology, and dermatology. Each section covers ten salient and commonly-encountered areas of practice by physicians. Multiple-choice questions and answers accompany each Section. The setting of writing is a developing country. The contents are relevant to doctors who practice in the medically advanced countries and those in the developing countries. Medically, the world has become an interesting place. Air travel, frequent movement, and resettlement of people now mean that doctors in developed countries can no longer stay and practice within the clinical conditions that were typical in their practice settings. Things have changed, as they cannot be certain of what medical conditions that patients from various parts of the world will present to them. Doctors also cannot be unequivocal that an emergency in a distant part of the globe may not require their attention. This book therefore meets the needs of doctors, irrespective of their length of practice or where they practice. What applies to doctors certainly applies to medical students. This book is an atypical book as it puts in its two volumes of less than 500 pages of 8.5"x 11" per volume material that any doctor, anywhere, should keep on their office or consulting room bookshelf. The e-book version is also a veritable companion.
