The General Reader and the Academy Apr 28 2022 Penguin Classics have built their reputation as one of the largest and most successful modern imprints for 'classic' texts on the notion of 'the general reader'. Following an interrogation of this idea, Leah Tether investigates the publication of medieval French literature on this list and shines a light on the drivers, motivations, negotiations and decision-making processes behind it. Focusing on the medieval French texts published between c.1956 and 2000, Tether demonstrates that, rather than Penguin's frequently cited 'general reader', a more academic market may have contributed to ensuring the success of these titles.

Multinational Enterprises and the Law Oct 11 2020 This book analyses the major regulatory areas relating to multinational enterprises. It covers the main economic law issues relating to jurisdiction, entry and establishment controls and liberalisation, tax, company law, competition and technology transfer. It also deals with the increasingly prominent demands for corporate social responsibility covering labour, rights, human rights and the environment, and the recent developments in arbitral decisions that give increased importanceto the protection standards contained in ...

Plant-Associated Bacteria Jan 14 2021 This volume is envisioned as a resource for researchers working with beneficial and harmful groups of bacteria associated with crop plants. The book is divided into two parts, with Part 1 on beneficial bacteria including chapters on symbiotic nitrogen fixers and rhizosphere bacteria. The second part consists of detailed descriptions of 8 genera of plant pathogenic bacteria, including Agrobacterium and Herbaspirillum. Each chapter covers terminology, molecular phylogeny and more. soft-rot, Pseudomonas, Xanthomonas, Ralstonia, Burkholderia and Acidovorax There is an opening chapter on the plant-associated bacteria survey, molecular phylogeny, genomics and recent advances. And each chapter includes terminology/definitions, molecular phylogeny, methods that can be used (both traditional and latest molecular tools) and applications

Chemical Migration and Food Contact Materials Jun 18 2021 Food and beverages can be very aggressive chemical milieu and may interact strongly with materials that they touch. Whenever food is placed in contact with another substance, there is a risk that chemicals from the contact material may migrate into the food. These chemicals may be harmful if ingested in large quantities, or impart a taint or odour to the food, negatively affecting food quality. Food packaging is the most obvious example of a food contact material. As the demand for pre-packaged foods increases, so might the potential risk to consumers from the release of chemicals into the food product. Chemical migration and food contact materials reviews the latest controls and research in this field and how they can be used to ensure that food is safe to eat. Part one discusses the regulation and quality control of chemical migration into food. Part two reviews the latest developments in areas such as exposure estimation and analysis of food contact materials. The final part contains specific chapters on major food contact materials and packaging types, such as recycled plastics, metals, paper and board, multi-layer packaging and intelligent packaging. With its distinguished editors and international team of authors, Chemical migration and food contact materials is an essential reference for scientists and professionals in food packaging manufacture and food processing, as well as all those concerned with assessing the safety of food. Reviews worldwide regulation of food contact materials Includes the latest developments in the analysis of food contact materials Looks in detail at different food contact materials

Notes on Healing and Clarity Sep 29 2019

Computer-Assisted Research in the Humanities Jun 26 2019 Computer-Assisted Research in the Humanities describes various computer-assisted research in the humanities and related social sciences. It is a compendium of data collected between November 1966 and May 1972 and published in Computer and the Humanities. The book begins with an analysis of language teaching texts including the DOVACK system, a program used for remedial reading instruction. It then discusses the objectives, types of computer used, and status of the Bibliographic On-line Display (BOLD), semiotic systems, augmented human intellect program, automatic indexing, and similar research. The remaining chapters present computer-assisted research on language and literature, philosophy, social sciences, and visual arts. Students who seek a single reference work for computer-assisted research in the humanities will find this book useful.

Renunciation Through Wisdom Jul 28 2019 Renunciation Through Wisdom is a collection of essays originally written in Bengali and published by Srila Prabhupada in India during the 1940s. They were later translated into English by his disciples. In these essays Srila Prabhupada expands on themes found in the Bhagavad-gita, discussing such topics as why people are averse to God, the ultimate causes of suffering, and how the world's troubles are extraordinarily fleeting when seen from the standpoint of eternity. Students of Srila Prabhupada will recognize the same common-sense writing style in Renunciation Through Wisdom as in his later, well-known works such as Srimad-Bhagavatam and Bhagavad-gita As It Is, as well as his expertise at distilling the essence of India's ancient Vedic wisdom into powerful, convincing, practical, and easily readable directives.

Suriname Sep 09 2020 This paper reviews economic developments in Suriname during 1994-96. In 1995, there was a major turnaround in Suriname's economic and financial situation following the expansionary fiscal and monetary policies pursued in the first half of the 1990s and the political and economic disruptions of the 1980s. The marked improvement was owing to the restoration of financial discipline, a strengthening of international bauxite prices, and the unification and subsequent stabilization of the exchange rate. The inflation fell further to less than 1 percent in 1996.

Smart Packaging Technologies for Fast Moving Consumer Goods Nov 04 2022 Smart Packaging Technologies for Fast Moving Consumer Goods approaches the subject of smart packaging from an innovative, thematic perspective: Part 1 looks at smart packaging technologies for food quality and safety Part 2 addresses smart packaging issues for the supply chain Part 3 focuses on smart packaging for brand protection and enhancement Part 4 centres on smart packaging for user convenience. Each chapter starts with a definition of the technology, and proceeds with an analysis of its workings and components before concluding with snapshots of potential applications of the technology. The Editors, brought together from academia and industry, provide readers with a cohesive account of the smart packaging phenomenon. Chapter authors are a mixture of industry professionals and academic researchers from the UK, USA, EU and Australasia.

Mechanical Music Jan 02 2020 Covers the history, development, use and fall from favour of many types of exotic instruments, from pocket-sized musical boxes to roll-playing pipe organs and everything else in between. This book describes pianolas, organettes, roller organs, orchestrions, nickelodeons, carillons and more.

European Comparative Company Law Feb 24 2022 Company law is undergoing fundamental change in Europe. All European countries have undertaken extensive reform of their company legislation. Domestic reform has traditionally been driven by corporate failures or scandals. Initiatives to make corporate governance more effective are a feature of recent European law reform, as are measures to simplify and ease burdens on smaller and medium-sized businesses (SMEs). An increasing EU harmonisation is taking place through the Company Law Directives, and the free movement of companies is also facilitated by the case law of the European Court of Justice on the directives and the right to free movement and establishment in the EC Treaty. New European corporate forms such as the European Economic Interest Grouping (EEIG) and the European Company (SE) have added new dimensions. At a time of rapid development of EU and national company laws, this book will aid the understanding of an emerging discipline.

Global Legislation for Food Packaging Materials Aug 01 2022 Providing a truly global overview of legislation in all major countries, this practical volume contains the information vital for manufacturers of food contact materials and food producers, facilitating a comparison of the requirements and making mutual requirements easier to identify. It covers not only plastics but also other food contact materials, such as paper, board, coatings, ceramics, cork, rubber, and textiles.

Fruit Processing Jun 30 2022 Fruit and fruit products, in all their many varieties and variations, are major world commodities and part of the economic life blood of many countries, particularly in the developing world. The perception of the healthy nature of fruit is a major reason for its increased consumption in the developed world, and many consumers today find a wider selection of fruit varieties, available at all times of the year, than ever before. This volume, however, is not so much concerned with fresh fruit as those principal areas of processing to which it may be subjected. Fruit processing arose as a means of utilising a short-lived product and preserving its essential nutritional qualities as far as possible. A chapter on the nutritional aspects of fruit is included in this work to reflect the importance of this topic to most consumers. After a general introduction, the chapter on fruit storage is the only contribution which deals with a process from which fruit emerges in essentially the same physical condition. Beyond that the book sets out to cover most of the major areas in which fruit may be processed into forms which bear varying semblances to the original raw material.

Handbook of Fruits and Fruit Processing Oct 03 2022 The processing of fruits continues to undergo rapid change. In the Handbook of Fruits and Fruit Processing, Dr. Y.H. Hui and his editorial team have assembled over forty respected academicians and industry professionals to create an indispensable resource on the scientific principles and technological methods for processing fruits of all types. The book describes the processing of fruits from four perspectives: a scientific basis, manufacturing and engineering principles, production techniques, and processing of individual fruits. A scientific knowledge of the horticulture, biology, chemistry, and nutrition of fruits forms the foundation. A presentation of technological and engineering principles involved in processing fruits is a prelude to their commercial production. As examples, the manufacture of several categories of fruit products is discussed. The final part of the book discusses individual fruits, covering their harvest to a finished product in a retail market. As a professional reference book replete with the latest research or as a practical textbook filled with example after example of commodity applications, the Handbook of Fruits and Fruit Processing is the current, comprehensive, yet compact resource ideal for the fruit industry.

David Vizard's How to Port and Flow Test Cylinder Heads Aug 09 2020 Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Advanced procedures include unshrouding valves and developing the ideal port area and angle.

Food Shelf Life Stability Jul 20 2021 Food Shelf Life Stability provides a unique approach to understanding this critical subject by examining physical, chemical, and biochemical factors affecting food quality. The first section emphasizes the effects that water activity, glass transition, and plasticization have on temperature, water content, and time-dependant phenomena affecting

Seaport in Virginia George Washington's Alexandria Oct 30 2019 Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

121 Battalion History, May 10, 1943 - August 15, 1945 Nov 11 2020

The Open Method of Co-ordination in Action Dec 01 2019 The contributors in this volume examine the practical operations, at national and subnational levels, of the European Employment and Social Inclusion Strategies, which are the most important examples of the Open Method of Co-ordination as a new instrument of EU governance.

Crap CVs Mar 04 2020 Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

Beyond Text Sep 21 2021 This original new book represents a variety of art forms across different professional contexts. Its focus is on the ways that educational practitioners and leaders from a range of cultures, disciplines, professions and organizations practice arts-based research, and it explores how these can enable innovative means of learning and enhance professional and organizational development. This vibrant project allowed for long term systematic conversations between a large and unusually diverse group of twenty-nine people from eight organisations in six countries. It was unusually diverse in many senses: for some the word 'data' meant little, for others it was central to their daily work; for some artistic practice was core, while for others the arts were a means to an end; while some were social entrepreneurs running their own companies others were researching in universities and a number were doing both; some were working within the STEM disciplines of business, management, engineering, science, technology, sustainability and the built environment, others were in the social sciences of social and health care, education and youth work while others were engaged in rapid or long term social and cultural action as a means of resisting state violence and military occupation; some worked in one of the safest countries on the planet, others in one of the most tear-gassed refugee camps in the world. Within these professional groups there were also ranges of experience, for example senior researchers, early career researchers, PhD students, seasoned professional artists and newcomers to arts forms. Whilst the main communication of this group was English, six other major languages were spoken, Estonian, Finnish, Catalan, Spanish, Arabic and key stakeholders brought Swedish and Japanese into the space. This meant that while the conversations in and about arts-based practice were transnational, interdisciplinary and systematic, they had all the messy, troubled-ness that the intercultural on all of the above levels brings with it. This unique and exciting collection discusses how creative arts practices can have a significant impact on research across a range of international contexts, drawing on their own field of research and educational experience. For instance, drama, music, dance and visual arts can be used to understand how learners internalise concepts, reflect on how decisions are made in the midst of action in leadership education, or investigate the use of the intuitive alongside the rational and analytical in their educational experience. Non-textual arts-based forms of research can also provide modes of investigation into pedagogical and professional practices when applied to fields that normally lie outside of the arts. Its greatest strengths are its focus on arts-based research as a way of learning in a variety of contexts, and often in collaboration. Its consistent theoretical, artistic and professional engagements make it a very readable and engaging read. The representation of a variety of art forms across different professional contexts means that this book will have appeal to several readerships in higher education, including the following groups. Academics and practitioners using arts-based methods in organisation and business settings. Researchers in the arts and researchers generically in the social sciences, humanities and arts. University students of the arts, education and professional studies, especially those interested in the wider international and intercultural diversity of research methodologies. Those working in international research teams using any form of qualitative research will also find this collection very interesting. It also has potential interest for groups outside higher education with an interest in arts-based research – for example community groups looking to explore collaborative projects.
