On a Global Mission: The Automobiles of General Motors International Volume 3Jul 26 2019 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Makers Dec 31 2019 Make magazine, launched in February 2005 as the first magazine devoted to Tech DIY projects, hardware hacks, and DIY inspiration, has been hailed as "a how-to guide for the opposable thumb set" and "Popular Mechanics for the modern age." Itching to build a cockroach-controlled robot, a portable satellite radio or your very own backyard monorail? Hankering to hack a game boy or your circadian rhythms? Rather read about people who fashion laptop bags from recycled wetsuits and build shopping cart go-karts? Make is required reading. Now, following on the heels of Make's wildly popular inaugural issues, O'Reilly offers Makers, a beautiful hardbound book celebrating creativity, resourcefulness and the DIY spirit. Author Bob Parks profiles 100 people and their homebrew projects-people who make ingenious things in their backyards, basements and garages with a lot of imagination and a little applied skill. Makers features technologies old and new used in service of the serious and the amusing, the practical and the outrageous. The makers profiled are driven by a combination of curiosity, passion and plain old stick-to-itiveness to create the unique and astonishing. Most are simply hobbyists who'll never gain notoriety for their work, but that's not what motivates them to tinker. The collection explores both the projects and the characters behind them, and includes full-color photographs and instructions to inspire weekend hackers. Parks is just the man to track the quirky and outlandish in their natural maker habitats. A well-known journalist and author who covers the personalities behind the latest technologies, Parks' articles on innovations of all kinds have appeared in Wired, Outside, Business 2.0 and Make. He has contributed essays to "All Things Considered" on public radio and discussed trends in technology devices with Regis Philbin and Russ Mitchell on television. As a Wired editor, Parks directed coverage of new consumer technologies and contributed feature articles. All those who love to tinker or who fancy themselves kindred DIY spirits will appreciate Parks' eclectic and intriguing collection of independent thinkers and makers.

Where the Suckers MoonMar 14 2021 "For all the right reasons." "Cars that can." "What to Drive." "The perfect Car for an Imperfect World." Only one of these slogans would be chosen by Subaru of America to sell its cars in the recession year of 1991. As six advertising agencies scrambled for the account and the winner tried to churn out the Big Idea that would install Subaru in the collective national unconscious, Randall Rothenberg was there, observing every nuance of the chaos, comedy, creativity, and egotism that made up an ad campaign. One can read Rothenberg's book as the behind-the-scenes chronicle of the brief and very troubled marriage between a beleaguered automobile company and Wieden & Kennedy, an aggressively hip ad agency whose creative director despised cars. One can read it as a history of advertising's journey from the conventionally upbeat slogan "Helps Build Strong Bodies 12 Ways" to the supercool nineties minimalism of "Bo Knows." Either way, Where the Suckers Moon is a face-paced, insightful, and occasionally appalling look at an industry whose obsession with image has affected our entire culture.

Subaru Impreza WRX and WRX STI Aug 19 2021 Few cars in modern times have caused as much of a stir as the turbocharged Subaru Impreza. It came from nowhere at the start of the 1990s to claim three successive World Rally Championships for its makers in the middle of that decade, and went on to become an enthusiasts' car thanks to its affordability, high performance - and, of course, the glorious exhaust note of its unusual flat-four "boxer" engine. This book examines the three generations of Subaru Impreza WRX and WRX STI from 1992 - 2012, including how the roadgoing cars were developed from the successful rally models, production history and specification details. Topics covered include: History of the Impreza, and early days in competition with the Leone and the Legacy models. Construction and derivatives of the distinctive flat-four engine. Innovations in the Impreza's four-wheel-drive system. Design and specifications for special editions. Includes material from Prodrive on their limited edition models. Examines

both rally and roadgoing cars.
