[King and Emperor](#) Aug 22 2021 "King and Emperor takes on the compelling suspense of good detective work as well as good history."—The Wall Street Journal Charles I, often known as Charlemagne, is one of the most extraordinary figures ever to rule an empire. Driven by unremitting physical energy and intellectual curiosity, he was a man of many parts, a warlord and conqueror, a judge who promised "for each their law and justice," a defender of the Latin Church, a man of flesh and blood. In the twelve centuries since his death, warfare, accident, vermin, and the elements have destroyed much of the writing on his rule, but a remarkable amount has survived. Janet Nelson's wonderful new book brings together everything we know about Charles I, sifting through the available evidence, literary and material, to paint a vivid portrait of the man and his motives. Building on Nelson's own extraordinary knowledge, this biography is a sort of detective story, prying into and interpreting fascinating and often obdurate scraps of evidence, from prayer books to skeletons, gossip to artwork. Charles's legacy lies in his deeds and their continuing resonance, as he shaped counties, countries, and continents; founded and rebuilt towns and monasteries; and consciously set himself up not just as King of the Franks, but as the head of the renewed Roman Empire. His successors—even to the present day—have struggled to interpret, misinterpret, copy, or subvert his legacy. Janet Nelson gets us as close as we can hope to come to the real figure of Charles the man as he was understood in his own time.

**Hard Times** Jul 29 2019 The precipitous decline of the Soviet population's standard of living in the last years of the

USSR is one of the great ironies of the Gorbachev era. In *Hard Times*, economist William Moskoff takes a closer look at the objective and subjective experience of economic decline as it affected ordinary citizens. After an introductory survey of the Soviet economy during these years, Moskoff examines several key problems: the chronic shortages of food and consumer goods, so emblematic of Soviet life, and the hoarding, black marketeering, and corruption which scarcity fostered. Next he takes the measure of declining living standards in the late 1980s and early 1990s as reflected in prices and incomes, collapsing social programs, and rising indigency and homelessness. Employment, by contrast, shows a relatively small decline - a reflection of political rather than economic realities. In concluding chapters the population's response to the combined experience of political liberalization and economic distress is examined, with special attention to labor militancy and the radicalization of popular moods.

**The Mystery in School Finances** Jun 07 2020 There are critical roles in the budget process for the Superintendent, Finance Officer, and internal and external stakeholders. The superintendent functions similar to a Chief Executive Officer; they are the main go-between for the board of directors and the district. Providing a vision for the school district as a whole is critical, as well as working to ensure community engagement provides a comprehensive 360-degree perspective – which in turn drives the budget process to ensure it reflects the community served. School budgets, regardless of geography, follow state procedures for both development and final approval. These perfunctory tasks include putting a budget on display for viewing – receipt of public comment and a vote. What this book seeks to provide are ideas for incorporating ongoing community discussion and dialogue on the budget process. This book additionally provides insight and information unto the budget process that drives all school decisions.
