A best-seller. *Attached* Feb 01 2020 "Over a decade after its publication, one book on dating has people firmly in its grip." —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.

Factfulness Apr 04 2020 INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." — Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But *Factfulness* does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "*Factfulness* by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama **Factfulness:** The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't

mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

The Official Charles Bronson Quiz Book Dec 01 2019 Charles Bronson is undoubtedly the most notorious prisoner in Britain and is not only a household name but also as much of an institution as the multitude of Her Majesty's establishments whose doors he has graced over the last 37 years, most of that time spent in solitary confinement. A film about Charlie's life and several no-holds-barred autobiographies have allowed us many interesting insights into the real man behind the myths - the fitness fanatic, the poet, the artist, the philosopher and the comic, to name but a few of his myriad faces. So these 100 quiz questions should be more of short brain stretch than a life sentence. Charlie remains in solitary in Wakefield Prison, having had parole refused time and time again. He still dreams of that day of freedom and, together with his friends and well-wishers, will keep fighting for life outside 'the cage'. These quiz questions, however testing, will ensure that Charlie secures a place at the forefront of our minds and is never forgotten. Call TV quiz shows Oct 23 2021 Call TV quiz shows are an example of television programmes provided by commercial broadcasters in order to increase their revenue. The viewer watches the live broadcast, then sends a text message or makes a premium rate telephone call in order to take part, with the broadcaster keeping a proportion of the call revenue. The Culture Committee has decided to examine this development, and whether some form of regulation is required since the programmes seem to be another means of gambling, with some members of the public complaining about them. This report therefore has set out a number of recommendations as to how broadcasters and regulators should address this. The Committee states that there seems to be a lack of fairness and transparency throughout the process. For example, players are generally not told that it is a matter of luck whether a call is connected to the studio and that the chances of getting through are very slim. Also the cost of calling is not always made as clear as it might be, or the amount players might have to spend to win a prize. Primary responsibility for maintaining confidence in the Call TV quiz show format rests with the operating

companies and the broadcasters. The Committee believes that the guidance drawn up by the two main regulators, Ofcom and ICSTIS does not go far enough; the Committee also states that Call TV quiz shows should constitute gaming under the Gambling Act 2005, and the Culture Department and the Gambling Commission should consider this as a matter of urgency; operators should have voluntarily introduced practices intended to help viewers who make repeated premium rate calls appreciate how much they are spending; also some assessment of the addiction to participation in such shows should be undertaken; viewers should be made aware that puzzles on Call TV quiz shows have a cryptic element, and that Ofcom should make it obligatory to have games verified with a third party and solutions lodged with them to prevent underhand changes being made while the show is on air; Ofcom should also publish periodic reports on its monitoring of Call TV quiz programmes; any practice of misleading viewers about call volumes or of blocking of calls would be unfair and fraudulent and should be punished under criminal law; the Committee recommends that broadcasters should be required to display some recent historical information about volume of incoming calls, and the odds of being connected to the studio; also that a single body, Ofcom, take responsibility for registering all complaints.

More than 600,000 people have taken her online quiz, and managers, doctors, teachers, spouses, and parents already use the framework to help people make significant, lasting change.
