Registries for Evaluating Patient Outcomes Sep 07 2020 This User ' s Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User ' s Guide was created by researchers affiliated with AHRQ ' s Effective Health Care Program, particularly those who participated in AHRQ ' s DEClDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Organizational Behaviour: Text and Cases, 3rd Edition May 16 2021 The third edition of Organizational Behaviour: Text and Cases offers a concise yet comprehensive coverage of the theories that determine behaviour in organizations. The relationship between effective organizational behaviour and the effective functioning of an organization is established through a clear and lucid style of presentation. With the help of necessary concepts, tools and techniques necessary for understanding behaviour in organizations, this book attempts to unfold human behaviour at four levels; starting from the individual processes and moving on to the interpersonal, organizational, and change processes. It encourages active learning through exercises, field projects and case studies, and develops competencies that are essential for becoming successful managers and effective employees in organizations. The three new chapters—Career, Planning and Management; Performance and Reward Management; and Gender Issues in Management—help readers understand organizational behaviour in the current Indian business scenario better. KEY FEATURES • Classroom-tested case studies pertaining to actual incidents from the workplace • Several examples from BPCL, HCL Technologies, Wipro, Infosys and SAP highlighting the best practices in the industry • Caselets focusing on behavioural issues in organizations • Field projects involving students in data collection and analysis • Marginalia summarizing crucial points and serving as quick references • A companion website featuring multiple-choice questions, learning objectives, an instructor ' s manual, and PowerPoint lecture slides enabling effective presentation of concepts

[Spine Imaging: Case Review Series](#) Dec 31 2019 Spine Imaging, a title in the popular Case Review Series, helps you effectively prepare for certification, recertification, and practice in spine imaging with case studies that test your knowledge of all essential topics. This medical

reference book will show you how to make confident, final diagnoses through accurate pattern recognition, clinical correlation, and differential diagnosis. "This book is likely to be most useful for (radiology) trainees in a neuroradiology department." Reviewed by: Gary Culpan, University of Bradford on behalf of RAD Magazine, Oct 14 Prepare effectively by reviewing 160 spine imaging cases, organized by level of difficulty, that mimic the new format of radiology certification and recertification exams. Every case includes at least 3 images and 4 multiple-choice review questions, along with rationales that explain why each answer is correct or incorrect. Ensure your knowledge is up to date with the aid of new and updated spinal imaging case studies covering modalities such as Spinal MRA imaging, SWI, CINE CSF flow, MR myelography and peripheral nerve imaging. New cases include discal cyst, polymyalgia rheumatica, Gaucher disease, pigmented villonodular synovitis, ventriculus terminalis cyst, and much more.

**Surgery Jan 30 2020** Surgery: A Case Based Clinical Review provides the reader with a comprehensive understanding of surgical diseases in one easy to use reference that combines multiple teaching formats. The book begins using a case based approach. The cases presented cover the diseases most commonly encountered on a surgical rotation. The cases are designed to provide the reader with the classic findings on history and physical examination. The case presentation is followed by a series of short questions and answers, designed to provide further understanding of the important aspects of the history, physical examination, differential diagnosis, diagnostic work-up and management, as well as questions that may arise on surgical rounds. Key figures and tables visually reinforce the important elements of the disease process. A brief algorithmic flow chart is provided so the reader can quickly understand the optimal management approach. Two additional special sections further strengthen the student's comprehension. The first section covers areas of controversy in the diagnosis or management of each disease, and another section discusses pitfalls to avoid, where the inexperienced clinician might get in trouble. The text concludes with a series of multiple choice questions in a surgery shelf/USMLE format with robust explanations. Surgery: A Case Based Clinical Review is based on 20 years of Socratic medical student teaching by a nine-time Golden Apple teaching awardee from the UCLA School of Medicine and will be of great utility for medical students when they rotate on surgery, interns, physician assistant students, nursing students and nurse practitioner students.

**Case Studies in Social Work Practice Apr 14 2021** A practical approach to understanding social work concepts in action that integrates theory and practice In this updated edition of the classic social work text, students and instructors have access to real-world demonstrations of how social work theories and concepts can be applied in practice.
