Teaching Comics Through Multiple Lenses Jun 19 2019 Building off the argument that comics succeed as literature—rich, complex narratives filled with compelling characters interrogating the thought-provoking issues of our time—this book argues that comics are an expressive medium whose moves (structural and aesthetic) may be shared by literature, the visual arts, and film, but beyond this are a unique art form possessing qualities these other mediums do not. Drawing from a range of current comics scholarship demonstrating this point, this book explores the unique intelligence/s of comics and how they expand the ways readers engage with the world in ways different than prose, or film, or other visual arts. Written by teachers and scholars of comics for instructors, this book bridges research and pedagogy, providing instructors with models of critical readings around a variety of comics.

Holocaust Icons in Art: The Warsaw Ghetto Boy and Anne Frank Jun 24 2022 The photographs of the unknown Warsaw Ghetto little boy and the well-known Anne Frank became famous documents worldwide, representing the Holocaust. Many artists adopted them as a source of inspiration to express their feelings and ideas about Holocaust events in general and to deal with the fate of these two victims in particular. Moreover, the artists emphasized the uniqueness of both children, but at the same time used their image to convey social and political messages. By using images of these children, the artists both evoke our attention and sympathy and our anger against the Nazis' crime of killing one and a half million Jewish children in the Holocaust. Because they represent different sexes, and different aspects - Western and Eastern Jewry - of Holocaust experience, artists used them in many contexts. This book will complete the lack of comprehensive research referring to the visual representations of these children in artworks.

Handbook of Game-Based Learning Nov 05 2020 A comprehensive introduction to the latest research and theory on learning and instruction with computer games. This book offers a comprehensive introduction to the latest research on learning and instruction with computer games. Unlike other books on the topic, which emphasize game development or best practices, Handbook of Game-Based Learning is based on empirical findings and grounded in psychological and learning sciences theory. The contributors, all leading researchers in the field, offer a range of perspectives, including cognitive, motivational, affective, and sociocultural. They explore research on whether (and how) computer games can help students learn educational content and academic skills; which game features (including feedback, incentives, adaptivity, narrative theme, and game mechanics) can improve the instructional effectiveness of these games; and applications, including games for learning in STEM disciplines, for training cognitive skills, for workforce learning, and for assessment. The Handbook offers an indispensable reference both for readers with practical interests in designing or selecting effective game-based learning environments and for scholars who conduct or evaluate research in the field. It can also be used in courses related to play, cognition, motivation, affect, instruction, and technology. Contributors Roger Azevedo, Ryan S. Baker, Daphne Bavelier, Amanda E. Bradbury, Ruth C. Adolescents and Literacies in a Digital World May 23 2022 By embracing a rapidly changing digital world, the so-called millennial adolescent is proving quite adept at breaking down age-old distinctions among disciplines, between high- and low-brow media culture, and within print and digitized text types. Adolescents and Literacies in a Digital World explores the significance of digital technologies and media in youth's negotiated approaches to making meaning within a broad array of self-defined literacy practices. Organized around a series of case studies, this book blends theories of an attention economy, generational differences, communication technologies, and neoliberal enactive texts with actual accounts of adolescents' use of instant messaging, shape-shifting portfolios, critical inquiry, and media production.

A Companion to the Harlem Renaissance Feb 26 2020 A Companion to the Harlem Renaissance presents a comprehensive collection of original essays that address the literature and culture of the Harlem Renaissance from the end of World War I to the middle of the 1930s. Represents the most comprehensive coverage of themes and unique new perspectives on the Harlem Renaissance available. Features original contributions from both emerging scholars of the Harlem Renaissance and established academic “stars” in the field. Offers a variety of interdisciplinary features, such as this section on visual and expressive arts, that emphasize the collaborative nature of the era. Includes “Spotlight Readings” featuring lesser-known figures of the Harlem Renaissance and newly discovered or undervalued writings by canonical figures.

Computation of Language Apr 22 2022 The study of linguistics has been forever changed by the advent of the computer. Not only does the machine permit the processing of enormous quantities of text thereby securing a better empirical foundation for conclusions—but also, since it is a modelling device, the machine allows the implementation of theories of grammar and other kinds of language processing. Models can have very unexpected properties both good and bad—and it is only through extensive tests that the value of a model can be properly assessed. The computer revolution has been going on for many years, and its importance for linguistics was recognized early on, but the more recent spread of personal workstations has made it a reality that can no longer be ignored by anyone in the subject. The present essay, in particular, could never have been written without the aid of the computer. I know personally from conversations and consultations with the author over many months how the book has changed. If he did not have at his command a powerful typesetting program, he would not have been able to see how his writing looked and exactly how it had to be revised and amplified. Even more significant for the evolution of the linguistic theory is the easy testing of examples made possible by the implementation of the parser and the computer-held lexicon. Indeed, the rule set and lexicon grew substantially after the successes of the early implementations created the desire to incorporate more linguistic phenomena.

Reading Feminist Theory Sep 22 2019 Reading Feminist Theory: From Modernity to Postmodernity interweaves classical and contemporary writings from the social sciences and the humanities to represent feminist thought from the late eighteenth century to the present. Editors Susan Archer Mann and Ashly Suzanne Patterson pay close attention to the multiplicity and diversity of feminist voices, visions, and vantage points by race, class, gender, sexuality, and global location. Along with more conventional forms of theorizing, this anthology points to multiple sites of theory production—both inside and outside of the academy—and includes personal narratives, poems, short stories, zines, and even music lyrics. Offering a truly global perspective, the book devotes three chapters and more than thirty readings to the topics of colonialism, imperialism and globalization. It also provides extensive coverage of third-wave feminism, poststructuralism, queer theory, postcolonial theory, and transnational feminisms.

Reckoning Dec 26 2019 The first history—incisive, witty, fascinating—of the fight against sexual harassment, from the author of the New York Times bestseller *Sisters in Law* Linda Hirshman, acclaimed historian of social movements, delivers the sweeping story of the struggle leading up to #MeToo and beyond: from the first tales of workplace harassment percolating to the surface in the 1970s, to the Clinton/Lewinsky scandal—when liberal women largely forgave Clinton, giving men a free pass for two decades. Many liberals even resisted the movement to end rape on campus. And yet, legal, political, and cultural efforts, often spearheaded by women of color, were quietly paving the way for the takedown of abusers and harassers. *Reckoning* delivers the stirring tale of a movement catching fire as pioneering women in the media exposed the Harvey Weinstens of the world, women flooded the political landscape, and the walls of male privilege finally began to crack. This is revelatory, essential social history.

Total Recovery Apr 29 2020 About 100 million Americans live with some form of chronic pain—more than the combined number who suffer from diabetes, heart disease, and cancer. But chronic pain has always been a mystery. It often returns at the slightest provocation, even when doctors can't find anything wrong. Oddly enough, whether the pain is physical or emotional, traumatic or slight, our brains register all pain as the same thing, and these signals can keep firing in the nervous system for months, even years. In *Total Recovery*, Dr. Gary Kaplan argues that we've been thinking about disease all wrong. Drawing on dramatic patient stories and cutting-edge research, the book reveals that chronic physical and emotional pain are two sides of the same coin. New discoveries show that disease is not the result of a single event but an accumulation of traumas. Every injury, every infection, every toxin, and every emotional blow generates the same reaction: inflammation, activated by tiny cells in the brain, called microglia. Turned on too often from too many assaults, it can have a devastating cumulative effect. Conventional treatment for these conditions is focused on symptoms, not causes, and can leave patients locked into a lifetime of pain and suffering. Dr. Kaplan's unified theory of chronic pain and depression helps us understand not only the cause of these conditions but also the issues we must address to create a pathway to healing. With this revolutionary new framework in place, we have been given the keys to recover.

Online Consumer Psychology Jul 21 2019 Addresses many of the issues created by the Internet and goes beyond the topic of advertising and the web to include topics such as customization, site design, word of mouth processes, and the study of consumer decision making while online.

Who Can Speak and Who Is Heard/Hurt? Oct 24 2019 Ethnic diversity, race, and racism have been subject to discussion in American Studies departments at German universities for many years. It appears

that especially in the past few decades, ethnic minorities and 'new immigrants' have increasingly become objects of scholarly inquiry. Such research questions focus on the U.S. and other traditionally multicultural societies that have emerged out of historical situations shaped by (settler) colonialism, slavery, and/or large-scale immigration. Paradoxically, these studies have overwhelmingly been conducted by white scholars born in Germany and holding German citizenship. Scholars with actual experience of racial discrimination have remained largely unheard. Departing from a critique of practices employed by the German branch of American Studies, the volume offers (self-)reflective approaches by scholars from different fields in the German Humanities. It thereby seeks to provide a solid basis for thorough and candid discussions of the mechanisms behind and the implications of racialized power relations in the German Humanities and German society at large.

Mike Nichols and the Cinema of Transformation Oct 16 2021 Mike Nichols burst onto the American cultural scene in the late 1950s as one half of the comic cabaret team of Nichols and May. He became a Broadway directing sensation, then moved on to Hollywood, where his first two films--Who's Afraid of Virginia Woolf? (1966) and The Graduate (1967)--earned a total of 20 Academy Award nominations. Nichols won the 1968 Oscar for Best Director and later joined the rarefied EGOT (Emmy, Grammy, Oscar, Tony) club. He made many other American cinematic classics, including Catch-22 (1970), Carnal Knowledge (1971), Silkwood (1983), Working Girl (1988), Postcards from the Edge (1990), and his late masterpieces for HBO, Wit (2001) and Angels in America (2003). Filmmakers like Steven Spielberg and Steven Soderbergh regard him with reverence. This first full-career retrospective study of this protean force in the American arts begins with the roots of his filmmaking in satirical comedy and Broadway theatre and devotes separate chapters to each of his 20 feature films. Nichols' permanent achievements are his critique of the ways in which culture constructs conformity and his tempered optimism about individuals' liberation by transformative awakening.

The Immortal Marilyn Nov 24 2019 From the late 1940s to the early '60s, Marilyn Monroe appeared in barely thirty movies, beginning with bit parts and moving on into supporting roles for such films as The Asphalt Jungle, All About Eve, and Clash by Night. She soon shot to international fame and gained prominent roles in a number of classics like The Seven Year Itch, Gentlemen Prefer Blondes, and Some Like It Hot. By the time of her early death in 1962, she had already become established as one of the great icons of the silver screen. Even early in her career, Monroe had been a source of inspiration for playwrights, filmmakers, and others looking to cash in on her tremendous impact. In The Immortal Marilyn: The Depiction of an Icon, authors John DeVito and Frank Tropea chronicle the many representations of Marilyn Monroe in the performing arts, from the 1950s to the present day. In a decade-by-decade review, the authors examine how Marilyn is portrayed in four distinct modes: as herself, as a Roman à Clef character, as a referent, and as a documentary subject. By looking closely at these individual works, the authors reveal the ways in which her persona, her history, and—most of all—her image have been appropriated for both fact and fiction. From an episode of I Love Lucy to Arthur Miller's play The Fall, from adaptations of works by Norman Mailer and Joyce Carol Oates to an ever-growing list of documentaries, Monroe has been the subject of countless depictions on stage, screen, radio, and television. Monroe is adored, imitated, and idolized, and the enormous amount of material written about her—either directly or indirectly—proves that she will continue to be a source of interest and speculation. The first real analysis of all the many complex meanings that Marilyn Monroe has come to assume, this book attempts to encapsulate and understand the enormous influence the actress had on the public and the wide range of creative talents who found her such an intriguing subject. This book

From Krakow to Krypton Aug 22 2019 Jews created the first comic book, the first graphic novel, the first comic book convention, the first comic book specialty store, and they helped create the underground comics (or "Comix") movement of the late '60s and early '70s. Many of the creators of the most famous comic books, such as Superman, Spiderman, X-Men, and Batman, as well as the founders of MAD Magazine, were Jewish. From Krakow to Krypton: Jews and Comic Books tells their stories and demonstrates how they brought a uniquely Jewish perspective to their work and to the comics

industry as a whole. Over-sized and in full color, From Krakow to Krypton is filled with sidebars, cartoon bubbles, comic book graphics, original design sketches, and photographs. It is a visually stunning and exhilarating history.
