Teacher Education for High Poverty Schools Sep 29 2019 This volume captures the innovative, theory-based, and grounded work being done by established scholars who are interrogating how teacher education can prepare teachers to work in challenging and diverse high-poverty settings. It offers articles from the US, Australia, Canada, the UK and Chile by some of the most significant scholars in the field. Internationally, research suggests that effective teachers for high poverty schools require deep theoretical understanding as well as the capacity to function across three well-substantiated areas: deep content knowledge, well-tuned pedagogical skills, and demonstrated attributes that prove their understanding and commitment to social justice. Schools in low socioeconomic communities need quality teachers most, however, they are often staffed by the least experienced and least prepared teachers. The chapters in this volume examine how pre-service teachers are taught to understand the social contexts of education. Drawing on the individual expertise of the authors, the topics covered include unpacking poverty for pre-service teachers, issues related to urban schooling as well as remote and regional area schooling.

Voters' Victory Dec 13 2020 Completes a triad of studies charting New Zealand's shift to a new MMP electoral system. This volume is the story of the first MMP election in 1996 and asks the question: is MMP beginning to deliver what its advocates hoped? The research for the text used two different multi-stage panels and featured a post-election postal survey of over 2000 electors, and a similar survey of election candidates from those parties securing parliamentary representation; a study based on daily telephone interviews throughout the 1996 election campaign; and post-election re-interviews.
