Costume in Performance Aug 19 2021 This beautifully illustrated book conveys the centrality of costume to live performance. Finding associations between contemporary practices and historical manifestations, costume is explored in six thematic chapters, examining the transformative ritual of costuming; choruses as reflective of society; the grotesque, transgressive costume; the female sublime as emancipation; costume as sculptural art in motion; and the here-and-now as history. Viewing the material costume as a crucial aspect in the preparation, presentation and reception of live performance, the book brings together costumed performances through history. These range from ancient Greece to modern experimental productions, from medieval theatre to modernist dance, from the 'fashion plays' to contemporary Shakespeare, marking developments in both culture and performance. Revealing the relationship between dress, the body and human existence, and acknowledging a global as well as an Anglo and Eurocentric perspective, this book shows costume's ability to cross both geographical and disciplinary borders. Through it, we come to question the extent to which the material costume actually co-authors the performance itself, speaking of embodied histories, states of being and never-before imagined futures, which come to life in the temporary space of the performance. With a contribution by Melissa Trimmingham, University of Kent, UK

Inside the C-Suite Sep 07 2020 In the corporate world, one question that's often asked is, 'What does it take to reach the top and stay there?' Be it the fancy MBA in a hurry to get to the top or the hard-

working manager slogging for years or the sycophant who flatters his way up the corporate ladder, the C-suite is the ultimate aspiration for everyone. Taking you right inside the C-suite, Jayaram Easwaran presents twenty-one stories based on real incidents during his three-decade career. Each story has a message that addresses the most pertinent problem of our work lives. Stories about the dilemma of being virtuous when the stakes are high, the pitfalls of judging a book by its cover, the dangers of blind ambition, ego squabbles among top brass and many others make this book a treasure-trove of wisdom. This is a book that will help you get your way in business and life.

Eligibility to Use the Fund's Facilities for Concessional Financing for 2017 Jul 18 2021 The review of PRGT-eligibility, conducted biennially, is guided by a transparent, rules-based, and parsimonious framework. The framework determines which IMF members can access concessional resources based on an assessment of their level of income per capita, market access, and serious short-term vulnerabilities. Application of the framework should be consistent with the self-sustainability of the PRGT's lending capacity over time. This paper concludes that the existing framework remains generally appropriate. The PRGT-eligibility framework is broadly aligned with the World Bank's International Development Association practices, with minor differences between the lists of eligible countries explained by differences in the mandates of the two institutions and the timing of their respective review cycles. None of the countries that have graduated from the PRGT-eligibility list are at immediate risk of re-entering it. No country is proposed for graduation from or entry onto the PRGT-eligibility list. While thirteen countries meet either the income or market access graduation criterion, all are assessed to be facing serious short-term vulnerabilities and thus none are proposed for graduation. No non-PRGT-eligible country meets the criteria for entry onto the PRGT-eligibility list. The proposal to keep the list of PRGT-eligible countries unchanged is consistent with the self-sustained capacity of the PRGT.

International Institutions and Economic Development in Asia Mar 02 2020 Are international and Asian regional institutions serving the development goals of Asian and Pacific Economies as well they should? The global economy, led by the Asia Pacific region, has undergone immense change and growth. Have the existing institutions and arrangements been able to keep pace with those changes in the global economy? International Institutions and Asian Development tackles these questions and is an essential book for the assessment of regional and international institutions, as well as policy prescriptions for reforming them to ensure they deliver on sustainable, peaceful growth and development in the region. Drawing from papers presented to the 32nd Pacific Trade and Development conference in Hanoi in 2007, the contributions by distinguished authors add to the understanding of the purpose, evolution, relevance and gaps in regional and global institutions and their arrangements. Eligibility to Use the Fund's Facilities for Concessional Financing, 2015 Nov 02 2022 The review of PRGT eligibility continues to be guided by the principles of maintaining a transparent, rules-based, and parsimonious framework—ensuring uniformity of treatment across members in similar situations while taking appropriate account of country-specific circumstances. The graduation policy seeks to maintain broad alignment with the World Bank's IDA graduation practices, while also remaining consistent with the principle of ensuring the self-sustainability of the PRGT's lending capacity over time. The paper concludes that the existing framework remains broadly appropriate, but could be enhanced in a few areas, including: Making use of additional data sources, namely the IMF BEL database, in assessing that a country has durable and substantial market access, supplementing the current reliance on the World Bank's IDS database that is produced with a significant lag; Sharpening the specification of circumstances under which the presence of serious short-term vulnerabilities would justify non-graduation of a country that meets the income graduation criterion. This would entail limiting the application of the serious short-term vulnerabilities criterion for countries that exceed the applicable income graduation threshold by 50 percent or more.

What Works in Girls' Education Dec 23 2021 Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

The Girl at the Baggage Claim Feb 10 2021 A provocative and important study of the different ideas

Easterners and Westerners have about the self and society and what this means for current debates in art, education, geopolitics, and business. Never have East and West come as close as they are today, yet we are still baffled by one another. Is our mantra "To thine own self be true"? Or do we believe we belong to something larger than ourselves--a family, a religion, a troop--that claims our first allegiance? Gish Jen--drawing on a treasure trove of stories and personal anecdotes, as well as cutting-edge research in cultural psychology--reveals how this difference shapes what we perceive and remember, what we say and do and make--how it shapes everything from our ideas about copying and talking in class to the difference between Apple and Alibaba. As engaging as it is illuminating, this is a book that stands to profoundly enrich our understanding of ourselves and of our world.

The Witches' Almanac: Issue 34, Spring 2015 to Spring 2016 Jan 12 2021 Founded in 1971 by Elizabeth Pepper, the art director of Gourmet magazine for many years, The Witches' Almanac is a witty, literate, and sophisticated publication that appeals to general readers as well as hard-core Wiccans. At one level, it is a pop reference that will fascinate anyone interested in folklore, mythology, and culture, but at another, it is the most sophisticated and wide-ranging annual guide for the Wiccan enthusiast. Modeled after the Old Farmers' Almanac, it includes information related to the annual Moon Calendar (weather forecasts and horoscopes), as well as legends, rituals, herbal secrets, interviews, mystic incantations, interviews, and many a curious tale of good and evil. Although it is an annual publication, only about 15 percent of the content is specific to the date range of each issue. The theme of Issue 34 (Spring 2015—Spring 2016) is Fire the Transformer, and among our lineup of obscurities is the Krampus, a Wassail recipe, Botanicas, the Restless Dead, Rum, and the Tibetan Dorje.

Governing the Environment Nov 29 2019 This comprehensive overview of US environmental regulation?from the inception of the EPA through the current Bush administration?goes beyond traditional texts to consider alternatives to the existing regulatory regime, as well as the challenges posed by the global nature of environmental issues.Thoughtful and even-handed, Governing the Environment covers the full range of topics relevant to our understanding of current environmental policy. Clear, concise chapters move from the context of environmental policy to regulatory design, reform efforts, and notable private-sector innovations.In the process, the author argues that we've taken conventional environmental regulation as far as we can go?that we need to look for alternative ways of governing the environment, involving corporations that have expertise in the areas of technology, products, and markets. But, he cautions, there must be a careful integration of private-sector initiatives and public regulation.A notable feature of the text is an examination of the difficulties inherent in managing global environmental problems. Exploring recent efforts toward global environmental governance in the face of competing economic demands, the final section considers the ways in which a system of governance might compensate for the lack of effective international regulatory institutions.Marc Allen Eisner is Henry Merritt Wriston Chair of Public Policy in the Government Department at Wesleyan University. Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome Oct 09 2020 Myalgic encephalomyelitis (ME) and chronic fatigue syndrome (CFS) are serious, debilitating conditions that affect millions of people in the United States and around the world. ME/CFS can cause significant impairment and disability. Despite substantial efforts by researchers to better understand ME/CFS, there is no known cause or effective treatment. Diagnosing the disease remains a challenge, and patients often struggle with their illness for years before an identification is made. Some health care providers have been skeptical about the serious physiological - rather than psychological - nature of the illness. Once diagnosed, patients often complain of receiving hostility from their health care provider as well as being subjected to treatment strategies that exacerbate their symptoms. Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome proposes new diagnostic clinical criteria for ME/CFS and a new term for the illness - systemic exertion intolerance disease (SEID). According to this report, the term myalgic encephalomyelitis does not accurately describe this illness, and the term chronic fatigue syndrome can result in trivialization and stigmatization for patients afflicted with this illness. Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome stresses that SEID is a medical - not a psychiatric or psychological - illness. This report lists the major symptoms of SEID and recommends a diagnostic process. One of the report's most important conclusions is that a thorough history, physical examination, and targeted work-up are necessary and often sufficient for diagnosis. The new criteria will allow a large percentage of undiagnosed patients to receive an accurate diagnosis and appropriate care. Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome will be a valuable resource to promote the prompt diagnosis of patients with this complex, multisystem, and often devastating disorder; enhance public understanding; and provide a firm foundation for future improvements in diagnosis and treatment.

Who's to Blame for Greece? Aug 07 2020 Praise for the first edition: 'The new book by Michael Mitsopoulos and Theodore Pelagidis offers insightful analysis of the Greek drama. It makes fascinating reading and well demonstrates that the blame is widely shared.' Andr é Sapir, University Professor, Universit é libre de Bruxelles, Belgium, and former Economic Advisor to the President of the European Commission 'Who is to blame for Greece? If I could pick just two experts on the Greek debacle to answer this question it would be Theodore Pelagidis and Michael Mitsopoulos. And thankfully they have done just that in this penetrating analysis of what has happened to Greece over the past five years. It's a timely and incisive work and no one gets off easy a must read.' Landon Thomas, Jr, Financial Reporter, New York Times, USA This expanded and enlarged second edition of Theodore Pelagidis and Michael Mitsopoulos' popular Who's to Blame for Greece? (2016) reviews Greece's economy since its accession to the Monetary Union, with new research focusing on the perils of the populist Syriza government during the critical 'Grexit' period of 2015-2016. The authors also focus on political developments since that time and in particular propose a new form of taxation as well as explore debt sustainability in relation to Greece's economic challenges. This book will appeal to researchers, practitioners and policy makers interested in the EU and the political economy of Greece and offers valuable updates on the first edition.

Access to markets for smallholder farmers in Alto Mol ó cue and Molumbo, Mozambique: Mid-term impact evaluation of INOVAGRO II Aug 31 2022 The Innovation for Agribusiness (InovAgro) project, which launched with its first three year phase in 2010, uses a market system development (MSD)

approach towards the goal of increasing incomes of men and women small-scale farmers in northern Mozambique. InovAgro interventions promote improved agricultural productivity, participation in selected high-potential value chains and the development of inclusive and sustainable market systems, such that impacts are expected to last long beyond the termination of the project. This paper presents results from a midline quantitative impact evaluation of the second phase of the InovAgro project interventions (2014-2017). In it, we use a carefully designed and executed quasi-experimental study design to credibly attribute changes in market engagement and welfare of participating farmers to exposure to the InovAgro II project, identifying and testing in what respects the intervention was most successful, and what regard it had less impact. Although InovAgro II projects operate in 11 districts of Zambézia and Cabo Delgado provinces, this impact evaluation focuses on two districts in Zambézia province (Alto Molócue and Molumbo), and in terms of value chains, focuses on the soybean and pigeon pea high-potential value chains, while the InovAgro II project interventions focus on these in addition to maize, sesame and groundnut. A baseline survey was undertaken in 2015 covering the 2014/2015 agricultural season and a midline follow-up survey was conducted in 2017, covering the 2016/2017 agricultural season and reaching 1,749 households of the original 1,886 households interviewed in the baseline survey. Using difference-in-difference estimation and propensity score matching, we find that exposure to the InovAgro II project is associated with an increase in the proportion of households selling soybean and pigeon pea by approximately 5% and 16%, respectively (significant at the .01 level). Exposure to the InovAgro II project also results in significantly higher shares of smallholder farmers using improved seed for soybean and pigeon pea (an increase of 6% for soybean and 2% for pigeon pea). We find that the InovAgro II project is also associated with significant increases in access to agricultural output market information from formal sources (5%) and hired labor for farming activities (8%). Despite the significant impacts on short term outcome variables, exposure to the InovAgro II project had limited impact on long term outcome variables, such as on rural-urban migration as well as engagement in the non-farm sector (two proxies for assessing potential welfare implications of the project) however this finding is not surprising given the impact evaluation covers only two years-a short period of time to bring about the long-term impacts expected to eventually emanate from an MSD project.

The Changing Role of Central Banks Jan 24 2022 The Changing Role of Central Banks derives lessons from current economic and financial challenges as well as failures in confronting them. Through this approach, it brings under perspective political and social reactions to major economic problems of the last ten years, particularly those pertaining to money and initiatives taken by central banks.
