[The Heart Surgery of The Potential Minister of The Gospel](#) Jan 24 2022 [The Heart Surgery of the Potential Minister of the Gospel](#) presents a series of lectures by Professor Zacharias Taneë Fomum to Missionaries and would-be missionaries. The author goes into great dept to provide biblical insight on God's primary concern about the Gospel minister - The WHO or the WHAT. The determinant factor in the acceptance, usefulness, and impact of a minister of the Gospel in the service of God, The expedient attributes and qualifications of a competent minister of the gospel? Drawing from his own life experience and spiritual history with God, he explained the kind of life and heart God desires and approves of in a minister of the Gospel. This book is a must-read for every minister and would-be minister of the gospel who desires that the Lord?the great Physician?should work through the Holy Spirit in him or her to perform the needed surgery that would produce a useful vessel whose life and work can find acceptance before God, bring joy to His heart and receive His approval and commendation.

[Demystifying Discussion](#) Nov 21 2021 How do you take the passion and chatter that K-5 students bring to the classroom and turn it into conversation skills that make them better learners?

Academic conversation can help hone speaking and listening, critical thinking, and social-emotional skills, as well as deepen content knowledge. But despite its effectiveness, this kind of

purposeful, student-led discussion is rarely taught or used at the elementary level. The mystery for teachers is how to support students at various stages of development and build an environment of trust that lets them cultivate these skills. In *Demystifying Discussion*, veteran teacher Jennifer Orr gives elementary school teachers a primer on teaching students to engage in student-led academic conversation. The strategies, sample assessments, and example conversations in this book show you how to help young learners get better at sharing, exploring, and synthesizing their individual and collective thinking. You'll also learn how to manage different perspectives and disagreements among students. This is a book to use all year long to improve classroom discussion, hone students' skills (and your own), and enhance students' overall learning throughout their time in school and beyond.

*Addressing Challenging Moments in Psychotherapy* May 04 2020 "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

*Democratization of Expertise* Jan 30 2020 We create technology enabling us to do things never before possible and it ultimately changes the way we live, work, play, and interact with each other. Throughout human history, the democratization of technology making a technology available to the masses, has brought about sweeping cultural, social, political, and societal changes. In the last half-century, the democratization of computers, information, the Internet, and social media have revolutionized and transformed our lives. We now stand at the beginning of a new era sure to bring about waves of new revolutions, the cognitive systems era. Until now, humans have done all of the thinking. However, our lives are about to be infused with artificial entities capable of performing high-level cognitive processing previously possible only in the human mind. Systems capable of this kind of "synthetic cognition" will achieve and surpass the level of human experts in almost every field of endeavor. Far from replacing humans, these cognitive systems will be our collaborators, teachers, confidants, colleagues, and companions. The future will belong to those who can better partner with these cognitive systems. Made available to the average person via the Internet, handheld devices, and through ordinary objects all around us, expertise will become democratized. Everything will change when anyone has access to expertise in any field and new things will be possible. The democratization of expertise is the foundation on which our society's revolutions will be built over the next half-century. This book discusses societal and cultural revolutions throughout history brought about by the adoption of new technology and gives brief histories of human cognitive augmentation and artificial intelligence. In the coming cognitive systems era, humans, by collaboratively partnering with cognitive systems, will together achieve expert-level performance—synthetic expertise—with humans performing some of the cognitive processing and cognitive systems performing some. As the capabilities of cognitive systems improve over time, the balance of thinking will shift from being mostly human to mostly artificial. This book introduces the Levels of Cognitive Augmentation to describe this shift. Drawing from previous research in cognitive systems and intelligent agent theory, the knowledge stores required for expertise are identified in a Knowledge Level description of expertise. This book introduces a new abstract level, called the Expertise Level to describe the skills needed for expertise. Combining the knowledge-level and expertise-level descriptions, this book introduces the Model of

Expertise. This book demonstrates use of the Model of Expertise by presenting several synthetic expert architectures: a synthetic teacher (Synthia), a synthetic friend/therapist (Sy), a synthetic elderly companion (Lois), a synthetic research companion (Synclair), and an automated scientific hypothesis explorer (Ashe). This book is intended for anyone interested in the fields of cognitive systems, cognitive computing, cognitive augmentation, or artificial intelligence or the impact of technologies from these fields on society. Anyone doing research and development in the area of cognitive systems or artificial intelligence will find this book particularly useful.

**The Mental Connection** Mar 14 2021 The Mental Connection is a fictional story of a young man and woman who are strangers that find they have the ability, under certain circumstances, to communicate telepathically. This ability soon brings them together and their lives take on an adventure they didn't expect. The story begins with a frightening event that triggers the telepathic powers and leads to more serious adventures. Romance flourishes and that brings on more problems. An abortion by a friend adds a troubling moral situation.

**Connecting Histories** Sep 07 2020 Connecting Histories: Decolonization and the Cold War in Southeast Asia draws on newly available archival documentation from both Western and Asian countries to explore decolonization, the Cold War, and the establishment of a new international order in post-World War II Southeast Asia. Major historical forces intersected here—of power, politics, economics, and culture—on trajectories East to West, North to South, across the South itself, and along less defined tracks. Especially important, democratic-communist competitions sought the loyalties of Southeast Asian nationalists, even as some colonial powers sought to resume their prewar dominance. These intersections are the focus of the contributions to this book, which use new sources and approaches to examine some of the most important historical trajectories of the twentieth century in Burma, Vietnam, Malaysia, and a number of other countries.

**Blade-Mounted Trailing Edge Flap Control for Bvi Noise Reduction** Feb 10 2021 Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained.
