Is My School Better BECAUSE I Lead It? Dec 02 2019 In this latest installment to his series of best-selling self-reflection guides, celebrated educator, author, and motivational speaker Baruti Kafele offers school leaders 35 thought-provoking questions to ponder from one fundamental overarching query: "Is my school a better school because I lead it?" Musing deeply on discrete leadership matters is an essential component of success for anybody overseeing the day-to-day operations of a school, and doubly so in communities plagued by drugs, violence, or other markers of societal dysfunction. In this book, Kafele offers those seeking to improve the quality of instruction in their institutions hard-won wisdom on such critical issues as ensuring an optimal culture and climate, engaging in parent and community outreach, confirming emergency preparedness, rallying staff, and much more. Because the sheer volume of responsibilities for a principal or assistant

principal can leave you with very little time for developing an effective and consistent self-reflection regimen, Kafele has done the work for you. You need only open the book and begin reading to embark upon a penetratingly insightful journey destined to transform your practice, boost teacher satisfaction, and—most important of all—inspire students to excel academically.

My School in the Rain Forest Mar 29 2022 At a school that sits on the edge of the Sahara, students are learning to speak English from a teacher who stands in front of a Webcam in North America. These students are learning in a virtual classroom. In another part of the world, kids aren't waiting to ride the bus to school—they are waiting to hop in a boat that will take them to a school that floats on a river. And some kids don't mind heights, especially those who attend a school on the slope of a mountain in the Himalayas, in one of the most remote corners of the earth. Margriet Ruurs contacted teachers and volunteers, many of whom took cameras in hand to photograph their schools and students. In this lively photo-essay, readers get to know students—from the arid plains of southern Afghanistan to the rain forests of Guatemala—who are pursuing their dreams of a brighter future.

My School Improvement Doodle Book Jul 21 2021 If a picture is worth a thousand words, imagine the power of three pictures at a time. Which is exactly what former graphic designer turned teacher and leadership team member Ben Keeling has done. As thought provoking as it is simple, this book combines an expert knowledge of schools and learning, an enviable talent for graphic design and a keen sense of irony. First spotted by Independent Thinking founder Ian Gilbert following a Twitter exchange that stretched between Chile, the UK and Indonesia, this ground-breaking book uses three simple 'doodles' per page, each on a separate sticky note, to highlight key issues. Simple yet contagious, this book re-writes the rules when it comes to the literature of school improvement and should be on the desk of every school leader and teacher.

School is More Than a Building Aug 10 2020 A great school is so much more than a building? It is a place where children feel accepted for who they are. It is a place where kindness and empathy are commonplace. It is a place where children know and feel that people are there for them and that they are safe and loved. With its delightful watercolor illustrations of school life, School is More

Than a Building paints a positive picture of a school environment where children know and understand that the people who work there care and look out for their best interests. When read aloud, children are reminded that they are part of a very special community and that schools are there for them. The pandemic made it painfully clear just how sensitive children are to the world around them and how important schools are for many children's health and well-being. Unfortunately, for some children, schools are more than just a place for learning, they are also a place of refuge and escape. It is important that children are aware that schools are a safe place where there are people that they can trust and go to if they need help. School is More than a Building, it is a place where people listen. In addition to celebrating schools and everything they do, School is More Than a Building is a great book to generate discussion about the many aspects of school life. At KelleyDonner.com/school-is-more-than-a-building you will find lesson plans, bulletin board ideas, activities and more that can be used on a school wide-level, in the classroom, or in your library. School is an integral part of a child's life. School is more than a building, it is a place where?

My School Jul 09 2020 Education issues feature almost daily in print media, online, on the radio and on television, much of which focuses on the perceived deficits of students and teachers. Singled out for special attention are low socio-economic status (SES) schools which are frequently characterised by teachers and students with little investment in learning and teaching. Yet within this plethora of educational discussion there is no contemporary, longitudinal study of what it means to learn and teach in a disadvantaged school within the policy context of the 'education revolution' in Australia. Drawing on 500 interviews conducted over a four period with the Principal,

parents, teachers and students at a regional low SES school, this book challenges the profile of one school as represented on the 'My School' website which publishes the results of National Assessment Program in Literacy and Numeracy (NAPLAN). Chapters situate the original research within an international and national educational context, before exploring topics including leadership and management, student behaviour, constructs of the 'good teacher', the involvement of parents in school and the 'digital revolution'. The book closes with an appraisal of the major themes that emerged from the multiple perspectives of the study. This is the first book to provide a longitudinal ethnographic study of a school in Australia, which examines the impact of the 'education revolution' on the Principal, parents, teachers and students. It comprehensively challenges the official 'My School' representation of a low SES school and will appeal to researchers in education, as well as those involved in postgraduate teacher education and sociology courses, both from Australia and internationally.
