It Didn't Start with You Sep 29 2019 A groundbreaking approach to transforming traumatic legacies passed down in families over generations, by an acclaimed expert in the field Depression. Anxiety. Chronic Pain. Phobias. Obsessive thoughts. The evidence is compelling: the roots of these difficulties may not reside in our immediate life experience or in chemical imbalances in our brains—but in the lives of our parents, grandparents, and even great-grandparents. The latest scientific research, now making headlines, supports what many have long intuited—that traumatic experience can be passed down through generations. *It Didn't Start with You* builds

on the work of leading experts in post-traumatic stress, including Mount Sinai School of Medicine neuroscientist Rachel Yehuda and psychiatrist Bessel van der Kolk, author of *The Body Keeps the Score*. Even if the person who suffered the original trauma has died, or the story has been forgotten or silenced, memory and feelings can live on. These emotional legacies are often hidden, encoded in everything from gene expression to everyday language, and they play a far greater role in our emotional and physical health than has ever before been understood. As a pioneer in the field of inherited family trauma, Mark Wolynn has worked with individuals and groups on a therapeutic level for over twenty years. *It Didn't Start With You* offers a pragmatic and prescriptive guide to his method, the Core Language Approach. Diagnostic self-inventories provide a way to uncover the fears and anxieties conveyed through everyday words, behaviors, and physical symptoms. Techniques for developing a genogram or extended family tree create a map of experiences going back through the generations. And visualization, active imagination, and direct dialogue create pathways to reconnection, integration, and reclaiming life and health. *It Didn't Start With You* is a transformative approach to resolving longstanding difficulties that in many cases, traditional therapy, drugs, or other interventions have not had the capacity to touch.

The Game of Life (and How to Play It) by Florence Scovel Shinn Dec 01 2019 Most people consider life a battle, but it is not a battle, it is a game. It is a game, however, which cannot be played successfully without the knowledge of spiritual law, and the Old and the New Testaments give the rules of the game with wonderful clearness. Jesus the Christ taught that it was a great game of Giving and Receiving. If we give hate, we will receive hate; if we give love, we will receive love; if we give criticism, we will receive criticism; if we lie we will be lied to; if we cheat we will be cheated. We are taught also, that the imaging faculty plays a leading part in the game of life. Keep thy heart (or imagination) with all diligence, for out of it are the issues of life." (Prov. 4:23.)

Have We All Gone Mad? Why groupthink is rising and how to stop it Mar 28 2022 "With refreshingly clear-sighted analysis, Jerome Booth spells out how political, financial and social groupthink has damaged Britain - and, crucially, how we can tackle it. Highly recommended." - Liam Halligan, Daily Telegraph "Most of the worst political decisions of recent years were made when all the mainstream politicians thought the same thing and no one challenged them. Jerome Booth wisely analyses why this situation happens so often and what can be done about it. Every politician and every decision-maker should read this book." - Lord Frost, former Cabinet Office

minister "It is a long time since I read a book with which I agreed so comprehensively." - Lord Lilley, former Secretary of State *** We like to think of ourselves as rational, but human beings are fundamentally irrational creatures - and nowhere is that more apparent than in the fug of groupthink we see around us, from the boardroom to social media. Of the various forms of collective irrationality, groupthink is particularly dangerous. It involves adherence to a faulty consensus, often has a binary moral dimension (one is seen as either virtuous or evil) and is sustained through fear to challenge. Counter-intuitively, the most intelligent and erudite amongst us are particularly susceptible, and when groupthink takes hold, vigorous efforts are made to shut down debate and to bully and punish transgressors. As a result, toleration, liberalism, history, reason and science are under threat. Mass groupthink amongst both the elite and the masses affects millions of people. It has led to financial mismanagement leading up to the 2008 crisis and beyond; poor decision-making at the onset of Covid-19; exaggerated, unchallenged claims which have motivated nonsensical policies; and distortions in academia and journalism. In this remarkable and prescient book, Dr Jerome Booth investigates why some of us have abandoned reason in favour of trite memes, intolerance and hatred. Have we all gone mad? Or can we identify the patterns and causes of what is happening and try to stop it?

WHY COPS DIE (And How to Prevent It) May 30 2022 This book provides time- and experience-proven advice for responding safely and effectively to threats to a law enforcement officer's safety. It relies on law enforcement's bloody history to reveal what has gone wrong for a very long time - and how to fix it so that no more cops die needlessly. This book identifies the cop killers and the fatal errors that cops make, and it explores how these incidents happen and why. Most important of all, the book goes into detail about how to prevent these terminal errors and furnishes to-the-point advice for avoiding them. These tactics and techniques work. It offers the same common sense advice that solid patrol sergeants have been sharing with their briefing room charges for a long while. It has been assembled by a police chief who spent 15 years as a sergeant. WHY COPS DIE can be used in a lot of ways, all of them useful for drastically reducing the number of officers who die on the job every year. It should be issued to every law enforcement academy recruit. It is aimed across the spectrum of the law enforcement organization from the rookie to the first-line supervisor to the command staff. Chiefs and sheriffs will find it of value, as will those directly responsible for the training of law enforcement officers. By applying practical, potentially lifesaving advice to their daily duties law enforcement's first-line practitioners can sharply reduce the number of peacekeepers who die or are maimed in the future. That effort begins here.

The First 20 Hours May 06 2020 Forget the 10,000 hour rule- what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills-time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition- how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch

type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

The Trouble with English and How to Address It Jul 08 2020 This essential book will help English teachers to address the challenges and opportunities in creating a powerful, knowledge-rich, concept-led curriculum, which draws on lived experience and engages with cognitive science and other educational research. The Price We Pay Jun 06 2020 New York Times bestseller Business Book of the Year--Association of Business Journalists From the New York Times bestselling author comes an eye-opening, urgent look at America's broken health care system--and the people who are saving it--now with a new Afterword by the author. "A must-read for every American." --Steve Forbes, editor-in-chief, FORBES One in five Americans now has medical debt in collections and rising health care costs today threaten every small business in America. Dr. Makary, one of the nation's leading health care experts, travels across America and details why health care has become a bubble. Drawing from on-the-ground stories, his research, and his own experience, The Price We Pay paints a vivid picture of the business of medicine and its elusive money games in need of a serious shake-up. Dr. Makary shows how so much of health care spending goes to things that have nothing to do with health and what you can do about it. Dr. Makary challenges the medical establishment to remember medicine's noble heritage of caring for people when they are vulnerable. The Price We Pay offers a road map for everyday Americans and business leaders to get a better deal on their health care, and profiles the disruptors who are innovating medical care. The movement to restore medicine to its mission, Makary argues, is alive and well--a mission that can rebuild the public trust and save our country from the crushing cost of health care.

The Queens English May 18 2021 What is good English, and why do we need it? The Queen's English shows how the English language, used properly, has great power to

instruct, move and entertain people, but used incorrectly, can lead to a lack of clarity and confusion. This book informs in a light-hearted way, reminding readers how to use the basics of grammar, punctuation and spelling, as well as further teaching them new tips and tricks of style, rhetoric, vocabulary and the use of foreign phrases, to give their writing and speech a stylish and impressive flair. The book also shows the perils of using language incorrectly, offering extremely (if unintentionally) humorous examples of where bad English can cause one thing to mean something entirely different! Authoritative yet entertaining, and illustrated with pithy drawings, this is the ideal book for anyone who strives for clear, stylish and accurate communication.

Stolen Focus Jul 28 2019 NEW YORK TIMES BESTSELLER • Our ability to pay attention is collapsing. From the New York Times bestselling author of *Chasing the Scream* and *Lost Connections* comes a groundbreaking examination of why this is happening—and how to get our attention back. “The book the world needs in order to win the war on distraction.”—Adam Grant, author of *Think Again* “Read this book to save your mind.”—Susan Cain, author of *Quiet In the United States*, teenagers can focus on one task for only sixty-five seconds at a time, and office workers average only three minutes. Like so many of us, Johann Hari was finding that constantly switching from device to device and tab to tab was a diminishing and depressing way to live. He tried all sorts of self-help solutions—even abandoning his phone for three months—but nothing seemed to work. So Hari went on an epic journey across the world to interview the leading experts on human attention—and he discovered that everything we think we know about this crisis is wrong. We think our inability to focus is a personal failure to exert enough willpower over our devices. The truth is even more disturbing: our focus has been stolen by powerful external forces that have left us uniquely vulnerable to corporations determined to raid our attention for profit. Hari found that there are twelve deep causes of this crisis, from the decline of mind-wandering to rising pollution, all of which have robbed some of our attention. In *Stolen Focus*, he introduces readers to Silicon Valley dissidents who learned to hack human attention, and veterinarians who diagnose dogs with ADHD. He explores a favela in Rio de Janeiro where everyone lost their attention in a particularly surreal way, and an office in New Zealand that discovered a remarkable technique to restore workers’ productivity. Crucially, Hari learned how we can reclaim our focus—as individuals, and as a society—if we are determined to fight for it. *Stolen Focus* will transform the debate about attention and finally show us how to get it back.

Management consulting. The Why, What and How. Apr 16 2021 This book gives an overview of ways to work as a management consultant, including relationships with clients, ethics, pricing, contracts and some basic tools for delivering consulting services. This book was written for those who want to work in this area, for existing consultants, and also for managers and buyers of management consulting services. Quotes from the book: "This is the book I wish I could have read myself about 30 years ago when I first started my career as a young management consultant." "When young people are asked about their dream job, management consulting is often high on the list." "... when I was asked by the managing partner of the consulting firm what kind of consultant I wanted to become, my reply was honest surprise: Are there really different kinds?!" "What is the most important skill for a leader or manager to master? I would say it is the decision-making process." "Perhaps the most important strategic decision in management consulting is how to price your services, both how much you charge and what for." "Yes, I claim that to understand the internal and interpersonal politics of any organization, is a necessary prerequisite for a good management consultant." "I am sure that many organisational problems are based more on politics than on policies..." "... it will draw significant resources away into internal disintegration and fights, rather than freeing the same energy for external opportunities and tasks."

The Laws of Cooking Aug 21 2021 Foreword by Alton Brown. The Laws of Cooking . . . and How to Break Them encourages improvisation and play, while explaining Justin Warner's unique ideas about "flavor theory"-like color theory, but for your tongue. By introducing eleven laws based on familiar foods (e.g., "The Law of Peanut Butter and Jelly"; "The Law of Coffee, Cream, and Sugar"), the book will teach you why certain flavors combine brilliantly, and then show how these combinations work in 110 more complex and inventive recipes (Tomato Soup with "Grilled Cheese" Ravioli; Scallops with Black Sesame and Cherry). At the end of every recipe, Justin "breaks the law" by adding a seemingly discordant flavor that takes the combination to a new level.

How to Write a Sentence Apr 04 2020 "Like a long periodic sentence, this book rumbles along, gathers steam, shifts gears, and packs a wallop." -Roy Blount Jr. "Language lovers will flock to this homage to great writing." -Booklist Outspoken New York Times columnist Stanley Fish offers an entertaining, erudite analysis of language and rhetoric in this delightful celebration of the written word. Drawing on a wide range of great writers, from Philip Roth to Antonin Scalia to Jane Austen and beyond, Fish's How to Write a Sentence is much more than a writing manual—it is a penetrating exploration into the art and craft of sentences.

Why We Elect Narcissists and Sociopaths—And How We Can Stop! Sep 09 2020 The bestselling author and therapist describes how electing high-conflict personalities—from Hitler and Mao to Putin and Trump—threatens democracy. Democracy is under siege. The reason isn't politics but personalities: too many countries have come under the sway of high-conflict people (HCPs) who have become politicians. Most of these high-conflict politicians have traits of narcissistic personality disorder, antisocial (i.e., sociopathic) personality disorder, or both. This is the first and only guide for identifying and thwarting them. HCPs don't avoid conflict, they thrive on it, widening social divisions and exacerbating international tensions. Eddy, the world's leading authority on high-conflict personalities, explains why they're so seductive and describes the telltale traits that define HCPs—he even includes a helpful list of forty typical HCP behaviors. Drawing on historical examples from Hitler, Stalin, Mao, and Nixon to Trump, Maduro, and Putin, Eddy shows how HCPs invent enemies and manufacture phony crises so they can portray themselves as the sole heroic figure who can deal with them, despite their inability to actually solve problems. He describes the best ways to expose HCPs as the charlatans they are, reply to their empty and misleading promises, and find genuine leaders to support. Eddy brings his deep psychotherapeutic experience to bear on a previously unidentified phenomena that presents a real threat to the world. "Eddy details a prescriptive, strategic action formula for preventing the predictable destructive outcomes of authoritarian leaders. This book will alarm you, inform you, and shake up your perspective—propelling you to take action—but only reasonable and effective action!" -Donald T. Saposnek, PhD, author of Mediating Child Custody Disputes
