**Ukraine** Nov 24 2021 This paper discusses Ukraine's Request for Extended Arrangement Under the Extended Fund Facility (EFF) and Cancellation of Stand-by Arrangement (SBA). Despite tangible progress under the SBA, the crisis in Ukraine has increased its balance of payments and adjustment needs beyond what can be achieved under the current program. The authorities' new four-year IMF-supported program aims to decisively address these challenges. The program lays out a strategy to restore financial and economic stability and resolve long-standing structural obstacles to growth. In view of Ukraine's large external financing needs and the authorities' strong policy commitments, the IMF staff supports approval of Ukraine's four-year Extended Arrangement under the EFF with access equivalent to SDR 12.348 billion.

[Delivering Value with BIM](#) Jun 27 2019 Building Information Modelling (BIM) is a global phenomenon which is gaining significant momentum across the world. Currently there is little information on how to realise and monitor benefits from implementing BIM across the life-cycle of a built environment asset. This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory. It presents an approach for practitioners aiming to implement BIM across the life-cycle of built environment assets, including both buildings and infrastructure. Additionally, the book features: wide-ranging information about BIM, the challenges of monitoring progress towards benefit goals and the greater context of implementation; a set of dictionaries that illustrate: how benefits can be achieved, what the benefit flows are and the enabling tools and processes that contribute to

achieving and maximising them; a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM; real-world examples from across the world and life-cycle phases that show how these benefits can be achieved; and information on international maturity and competency measures to complement the value realisation framework. Including a blend of academic and industry input, this book has been developed in close collaborative consultation with industry, government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM-related courses. [Palliative care for older people](#) Apr 29 2022 Current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25-30% of people over the age of 85 will show some degree of cognitive decline. Palliative care for older people: A public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that, as the global population ages, will ever more acutely shape the decisions of policy-makers and care-givers. The book begins by outlining the range of policies towards palliative care for older people that are found worldwide. It follows this by examining an array of socio-cultural issues and palliative care initiatives, from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients, and from the need to encourage compassion towards end-of-life care within communities to the development of care pathways for older people. Palliative care for older people: A public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world. The book also highlights the social-cultural considerations that influence the difficult decisions that those involved in palliative care face, not least patients themselves, and offers examples of good practice and recommendations to inspire, support, and direct healthcare policy and decision-making at organisational, regional, national and international levels.

[The Athletic Experience at Historically Black Colleges and Universities](#) Dec 26 2021 Historically Black Colleges and Universities (HBCUs) are valuable institutions that provide intellectual domains for racial uplift, racial refuge, and cultural empowerment within a continually polarized nation. Today's current racial climate reminds us of the historical context that gave birth to HBCUs and segregated athletic experiences. While the sporting life at HBCUs is an integral part of these institutions' mission, there is a dearth of

research about HBCU athletics. In *The Athletic Experience at Historically Black Colleges and Universities: Past, Present, and Persistence*, leading scholars from across the nation present a holistic examination of the integral role sports have played at HBCUs. Chapters in this volume cover a range of topics, from HBCU Football Classics to economics. It begins with a historical overview of HBCUs and the early sporting life before delving into the experiences of today's male and female student-athletes—including the unique perspectives of athletes who transferred from historically White colleges and universities to HBCUs. Other chapters examine economic issues at HBCUs, such as the financial viability of their athletic departments in the context of the larger NCAA economic framework, and recommendations for the future of HBCU athletics to restore both academic and athletic excellence at these institutions. An important addition to the existing literature on race in contemporary society, this volume provides a narrative of the Black experience from the historical origins of educating Blacks, their early athletic experiences, and the current state of athletics at HBCUs. *The Athletic Experience at Historically Black Colleges and Universities* is a significant contribution to the debate on college athletics and higher education, in general, and athletics at HBCUs, specifically. It is a must-read for sport studies scholars and students, sport management practitioners, and sport enthusiasts of the inter-workings of athletics and the HBCU experience.

**Antimicrobial Chemotherapy** May 19 2021 Antimicrobial agents are essential for the treatment of life-threatening infections and for managing the burden of minor infections in the community. In addition, they play a key role in organ and bone marrow transplantation, cancer chemotherapy, artificial joint and heart valve surgery. Unlike other classes of medicines, they are vulnerable to resistance from mutations in target microorganisms, and their adverse effects may extend to other patients (increased risk of cross-infection). As a consequence, there is a constant requirement for new agents, as well as practices that ensure the continued effective prescribing of licensed agents. The fully revised and updated seventh edition of *Antimicrobial Chemotherapy* is an essential guide to the principles of antimicrobial chemotherapy, the problem of resistance and its control through policies, antimicrobial stewardship and surveillance. The book provides an aid to informed, rational prescribing for common bacterial, fungal, parasitic and viral infections. Divided in five parts, the book covers issues specific to both the developed and developing world. Part 1 'General property of antimicrobial agents' discusses mechanisms of action and resistance to antibacterial, antifungal antiprotozoal, antiviral, and antiviral agents. Part 2 'Resistance to antimicrobial agents' provides guidance about the problem of resistance, mechanisms of acquired resistance and genetics of resistance. Part 3 'General principles of usage of antimicrobial agents' analyses the use of the laboratory, general principles of the treatment of infection, dosing in special groups (extremes of age, pregnancy, obesity), safe prescribing, prophylaxis and the role of policies in antimicrobial stewardship. Part 4 'Therapeutic use of antimicrobial agents' provides advice about the treatment of common infections which are described by anatomical. There are also chapters on the management of mycobacterial disease, viral infections, HIV/AIDS and parasitic infections. The final part of the book analyses the development and marketing of antimicrobial drugs. This seventh edition of *Antimicrobial Chemotherapy* continues to be a valuable resource for undergraduates and graduates requiring a thorough grounding in the scientific basis and clinical application of these drugs.

Public and academic libraries will want to make this annual reference product available for the general public in their Government collections. Students studying Public Finance, political scientists, and researchers will appreciate this detailed information with authoritative data legends presented in tables and graphs.

**Performing Welfare** May 31 2022 This book explores what happens to socially committed performance when state systems of social security are dismantled. Since 2010, a punishing programme of economic austerity and a seismic overhaul of the Welfare State in the United Kingdom has been accompanied by an ideological assault on dependency; a pervasive scapegoating of the poor, young, and disabled; and an intensification of the discursive relationship between morality and work. This book considers the artistic, material, and ideological consequences of such shifts for applied and socially engaged performance. Performing Welfare reveals how such arts practices might reconstitute notions of work and labour in socially constructive ways. It focuses on the political potential of participation during a period in which classifications of labour and productivity are intensely contested. It examines the migration of discourses from state policy to the cultural sector; narratives of community and aesthetics of dependency; the paradoxes of visibility in creative projects with stigmatised participants; the implicit relationship of participatory performance to neoliberal productivity; and, the parallels between gendered divisions of labour, social reproduction, and applied performance. It will appeal to students, scholars, and practitioners interested in applied and socially engaged performance, participation, community, representation, the welfare state, social policy, labour, and unemployment.

**Strengthening the resiliency of dryland forest-based livelihoods in Ethiopia and South Sudan** Jan 15 2021 This literature review explores how political, economic and resource management policies and programs can reduce forest degradation and increase the contribution of forest goods and services to sustainable livelihood strategies. In Ethiopia, studies indicate that forest dependency is strong throughout the country, but the importance of forest income varies across different regions and wealth categories. Research suggests that improving forest product market governance is key to strengthening forest livelihood resiliency. Recent experiments with forest governance devolution have shown mixed results in terms of improving forest conditions and livelihoods. Smallholder land certification has met with considerable success, whereas participatory forest management schemes have positive ecological outcomes but fall short in terms of livelihood gains. In South Sudan, civil war has limited the depth and scope of research on dryland forests and livelihoods. Food security analyses indicate that the importance of forest income varies by region and season. Markets are poorly developed and forest governance systems are weak in many parts of the country. Key threats to forest livelihoods in both countries include: shifting climatic conditions, large-scale population movements, large-scale land acquisitions and weakened governance institutions; and in South Sudan, continuing violent conflict. In Ethiopia, research and policy reform should focus on the relationship between forest rights devolution, livelihoods, forest management practices and forest conditions as well as on the impacts of demographic change on forest-based livelihoods, forest management and forest cover. In South Sudan, research should focus on documenting the impacts of conflict on forest-based livelihoods with an view to structuring humanitarian aid programs in ways that mitigate the negative impacts.

Intermediate Accounting Jul 21 2021 Due to the emergence of IFRS as the required convention for reporting to stock exchanges in the European Union and other important markets, accountants must gain a strong understanding of these standards. Intermediate Accounting integrates this new information throughout the chapters so they'll learn how to apply the new global accounting standards. Global examples are presented to clearly show how the information is utilized in the field. The use of various currencies is also explored, which is critical for accountants to know in today's global businesses environment.

**Ageing in Australia** Mar 05 2020 This stimulating volume examines the many faces of Australia's ageing population, the social and health issues they contend with, and the steps being taken—and many that should be taken—to help ensure a more positive and productive later life. Individual and societal ageing are conceptualized as developmental in nature, socially diverse, and marked by daily life challenges stemming from the country's economic structures, attitudes, geography, political landscape, and infrastructure. Wide-ranging coverage (e.g., health, inequalities, employment, transportation) assesses options available to older people, and the role of families, employers, service providers, government agencies, and others in promoting or expanding those choices. The book's double emphasis on challenges in older people's lives and opportunities for enhancing their quality of life is on clear display as case studies examine policy

issues—and propose solutions—in a societal and individual context. Included in the coverage: · Australian developments in ageing: issues and history. · Cultural diversity, health, and ageing. · Indigenous Australians and ageing: responding to diversity in policy and practice. · Enhancing the health and employment participation of older workers. · Housing and the environments of ageing. · Health services and care for older people. The rich examples in Ageing in Australia contain a depth of understanding and evidence for sociologists, gerontologists and psychologists studying ageing, health care professionals providing care to older people, and policy analysts assessing areas for improvement.

Case Studies in Management and Business (Volume 4) (UUM Press) Oct 04 2022 This is the fourth volume of the compilation of case studies by UUM's Institute of Management and Business Research (IMBRe). Following the successful publication of its three predecessors, the current Volume 4 selects and includes the best Malaysian case studies in the broad areas of management, economics and marketing. It is IMBRe's aspiration to encourage both academics and students to embrace the case-study approach as an effective pedagogical tool. The cases are designed and written by academics to be used for both undergraduate and postgraduate courses, in which the academics themselves, more often than not, serve as instructors. Although each case is written specifically to cater for a particular course, it can be adapted for other related courses.
