Chosen by a Horse Jul 08 2020 "Two kindred spirits find each other in

this beautifully written memoir about the human-animal bond” (Temple Grandin, author of *Animals in Translation*). When Susan Richards agreed to take on the care of one of the abused horses just rescued by the local SPCA, she didn’t know it was about to open a new chapter in her life. Things had not always been easy for Susan—she had lost her mother at the age of five and was raised by uncaring relatives, married unhappily and divorced, and suffered from alcoholism. But while Susan is trying to capture the horse assigned to her, a skeletal mare named Lay Me Down walks into her trailer of her own volition. Susan already owns one mare and two geldings—the diva-like Georgia, boyish Tempo, and hopelessly romantic Hotshot—but it is with Lay Me Down that she forges a special, healing relationship that alters her life. Poignant and evocative, *Chosen by a Horse* is a book for anyone who has ever loved a horse, and for everyone who has ever lost a loved one.

I Am Thomas May 30 2022 From high society in Vienna to a small flat in Sydney; from patrons of the arts to refugees from the Holocaust; this is the enthralling story of three generations of women spanning a century of upheaval.

Grandad Mandela Jan 26 2022 "...profoundly moving..." -Publishers Weekly Nelson Mandela’s two great-grandchildren ask their grandmother, Mandela’s youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child’s perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

Moment Maker Feb 24 2022 How to Make Every Moment of Every Day Count Every moment of every day, you have a choice to make. You can either let the minutes pass you by or you can claim them for what they are: opportunities to unlock the full depth of life’s potential. For Carlos Whittaker, renowned blogger, musician and worship leader, and husband and dad, living deliberately is a way of life. Making moments that are significant, memorable, or impactful are a part of how he

navigates each day, and it has forever changed the landscape of his story. In *Moment Maker*, Carlos explains his methodology for living intentionally and claiming moments that touch the lives of others, whether that be his family, his friends, his colleagues, or total strangers. Carlos isn't asking anyone to make a big investment in time, energy, or money. He is simply uncovering the investment of attention. You don't have to buy tickets to special events or orchestrate elaborate surprises. You just have to be aware—of your surroundings, the people you encounter, the things that interest those important to you, the opportunities that present themselves—and be prepared to seize those moments and see lives changed.

After Promontory Jan 02 2020 Celebrating the sesquicentennial anniversary of the completion of the first transcontinental railroad in the United States , *After Promontory: One Hundred and Fifty Years of Transcontinental Railroading* profiles the history and heritage of this historic event. Starting with the original Union Pacific—Central Pacific lines that met at Promontory Summit, Utah, in 1869, the book expands the narrative by considering all of the transcontinental routes in the United States and examining their impact on building this great nation. Exquisitely illustrated with full color photographs, *After Promontory* divides the western United States into three regions—central, southern, and northern—and offers a deep look at the transcontinental routes of each one. Renowned railroad historians Maury Klein, Keith Bryant, and Don Hofsmoer offer their perspectives on these regions along with contributors H. Roger Grant and Rob Krebs.

Room 555 Sep 21 2021 Fourteen-year-old Rooney loves hip-hop almost as much as she loves her grandmother. She cannot wait to compete in her school's dance competition. But as her grandmother's health deteriorates, Rooney becomes more and more reluctant to visit her in the care home. These feelings of guilt and frustration cause Rooney to mess things up with her hip-hop dance partner and best friend, Kira. But while doing some volunteer hours in the hospital geriatric ward, Rooney meets an active senior recovering from a bad fall. Their shared love of dance and the woman's zest for life help Rooney face her fears, make amends with Kira and reconnect with Gram before it's too late.

Quartz Crystal Oscillator Circuits Design Handbook Feb 12 2021 The object of this handbook is to assemble a set of design methods for crystal oscillators in the frequency range of 1 KC to 200 MC with the aim of facilitating design, eliminating crystal unit misapplications, and reducing design costs. The handbook is not directed at the design of ultra-stable crystal oscillators, but rather at the non-temperature controlled, medium frequency stability oscillator commonly in use in many types of communications equipment. The handbook contains discussions of: (1) The electrical characteristics of crystal units,

condition of usage, and methods of measurement. (2) Characteristics of tube and transistor amplifiers. (3) Characteristics of impedance transforming networks. (4) Detailed design information on series resonance and anti-resonance oscillators. (5) Design examples together with experimental evaluation data covering most of the 1 KC to 200 MC range. (Author).

Physical Sciences for NGSS Oct 30 2019 Physical Sciences for NGSS has been specifically written to meet the requirements of the Next Generation Science Standards (NGSS) for High School Physical Sciences (HS-PS). It encompasses all three dimensions of the standards (science and engineering practices, crosscutting concepts, and disciplinary core ideas), addressing the program content through a wide range of engaging student-focused activities and investigations. Through completion of these activities, students build a sound understanding of science and engineering practices, recognize and understand the concepts that link all domains of science, and build the knowledge base required to integrate the three dimensions of the standards to meet the program's performance expectations.

Slave Stealers Jan 14 2021 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Visual Basic 2008 Sep 29 2019 Created by world-renowned programming instructors Paul and Harvey Deitel, *Visual Basic 2008 How to Program, Fourth Edition* introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

AUDIENCE: Appropriate for anyone interested in learning programming with Visual Basic 2008.

Algorithm Design and Applications Aug 01 2022 Introducing a NEW addition to our growing library of computer science titles, *Algorithm Design and Applications*, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.
