on Hiroshima and Nagasaki made clear to everyone what nuclear energy was capable of inflicting, and the health problems encountered by people exposed to the radiation also demonstrated the horrific side effects that could come with the use of nuclear weapons or the inability to harness the technology properly. The first major accident at a nuclear power plant took place at Three Mile Island in Pennsylvania in 1979, which took nearly 15 years and \$1 billion to fully clean up after that disaster, but Three Mile Island paled in comparison to Chernobyl, which to this day remains the most notorious nuclear accident in history. Located in the Ukraine, the Chernobyl power plant was undergoing experiments in the early morning hours of April 26, 1986 when it suffered a series of explosions in one of its nuclear reactors, killing over 30 people at the plant and spread radioactive fallout across a wide swath of the Soviet Union. Although the Soviets would try to cover up

just how disastrous the accident at Chernobyl was, it was impossible to hide the full extent of the damage given that radioactive material was affecting Western Europe as well. All told, the accident caused an estimated \$18 billion in damages, forced the evacuation of everybody nearby, and continues to produce adverse health effects that are still being felt in the region. As with Three Mile Island before it, Chernobyl emphatically demonstrated the dangers of nuclear power plants, and it brought about new regulations across the world in an effort to make the use of nuclear energy safer. Meanwhile, scientists and scholars are still studying the effects of the radiation on people exposed to it and continue to come up with estimates of just how deadly Chernobyl will wind up being. The Chernobyl Disaster chronicles the worst nuclear accident in history and the aftermath of the accident. Along with pictures and a bibliography, you will learn

Unthinkable Apr 29 2022 An Amazon Best Nonfiction Book of the Month Indiebound Bestseller Award-winning science writer Helen Thomson unlocks the biggest mysteries of the human brain by examining nine extraordinary cases Our brains are far stranger than we think. We take it for granted that we can remember, feel emotion, navigate, empathise and understand the world around us, but how would our lives change if these abilities were dramatically enhanced - or disappeared overnight? Helen Thomson has spent years travelling the world, tracking down incredibly rare brain disorders. In Unthinkable she tells the stories of nine extraordinary people she encountered along the way. From the man who thinks he's a tiger to the doctor who feels the pain of others just by looking at them to a woman who hears music that's not

there, their experiences illustrate how the brain can shape our lives in unexpected and, in some cases, brilliant and alarming ways. Story by remarkable story, Unthinkable takes us on an unforgettable journey through the human brain. Discover how to forge memories that never disappear, how to grow an alien limb and how to make better decisions. Learn how to hallucinate and how to make yourself happier in a split second. Find out how to avoid getting lost, how to see more of your reality, even how exactly you can confirm you are alive. Think the unthinkable.

Distorting the Law Mar 29

2022 In recent years, stories of reckless lawyers and greedy citizens have given the legal system, and victims in general, a bad name. Many Americans have come to believe that we live in the land of the litigious, where frivolous lawsuits and absurdly high settlements reign. Scholars have argued for years that this common view of the depraved ruin of Online Library

legal system is a myth, but their research and statistics rarely make the news. William Haltom and Michael McCann here persuasively show how popularized distorted understandings of tort litigation (or tort tales) have been perpetuated by the mass media and reform proponents. Distorting the Law lays bare how media coverage has sensationalized lawsuits and sympathetically portrayed corporate interests, supporting big business and reinforcing negative stereotypes of law practices. Based on extensive interviews, nearly two decades of newspaper coverage, and in-depth studies of the McDonald's coffee case and tobacco litigation, Distorting the Law offers a compelling analysis of the presumed litigation crisis, the campaign for tort law reform, and the crucial role the media play in this process.

**Weird and Wacky Facts** Oct 04 2022 Presents a compendium of unusual facts, arranged in such categories as food, animals, the human body,

nature, customs, entertainment, and sports. *In Titanic's Shadow* Jun 07 2020 While the near 1,500 victims of Titanic accounted for a huge loss of life, each of the ships here had a greater number of casualties, in some cases more than five times as many. In total, these 27 merchant ship sinkings resulted in a staggering loss of life at sea - more than 96,000 in total, 3,840 per ship. While the circumstances were different to Titanic, the outcome in each case was no less tragic. Yet, despite the fact that Titanic ranks behind so many other losses, so powerful has her name become that it was the inevitable choice to describe some of these other events, 'Germany's Titanic' and 'The Titanic of Japan' being two examples. Ships include the Lancastria, Britain's worst maritime disaster with 3,000 lost; the Ryusei Maru, a Japanese 'Hellship' loaded with 6,000 Allied POWs, torpedoed by a US submarine; and the Wilhelm Gustloff, a German liner packed with 7,800

[the Library familiesgivingback.org](https://www.familiesgivingback.org) on December 6, 2022 Free Download Pdf

civilians, sunk by a Russian submarine. There were no survivors and this tragedy was the worst maritime disaster of all time.

**Wicked Women** Dec 14 2020  
Karla Homolka is regarded by the Canadian media as North America's most reviled female serial killer for her part in the torture, rape and murder of three young girls, including her own sister, between 1991-1992. But, best-selling true crime author and former criminal lawyer, David Elio Malocco, makes the case that as she was systematically tortured and raped by her husband, the depraved sadist, serial killer and rapist, Paul Bernardo, that she was suffering from Battered Spouse Syndrome and did not emotionally comprehend the crimes of which she was convicted. He opens up the case files including psychiatric reports and never before disclosed accounts to present the Case for Karla Homolka. Despite the infamous statement

of an FBI profiler delivered at a convention in 1998 that there were no female serial killers the author tells us that since 1610 there are over 700 documented cases of female serial killers. This book deals with twenty of the world's most notorious female serial killers. Of the twenty serial killers profiled, eight are still alive, seven are in prison, one is free and one is due for release in the near future. The book begins with the Hungarian Countess Elizabeth Bathory, the inspiration for Bram Stoker's Dracula. Bathory, a lesbian vampire, sexual sadist and reviled torturer, is reputed to be the world's most prolific serial killer with a total kill count of 650 victims. But newly discovered evidence, translated for the first time into English by renowned Bathory expert, Professor Kimberly Craft, dispels some of the myths surrounding the Blood Countess of Hungary. Did she really rip the throats of young virgins with her own teeth and later bathe in their blood to preserve her beauty?

fascinating up-dated account of this real life vampire. The author separates the killers by way of motive into Thrill Seekers (Marta Beck, Myra Hindley, Aileen Wuornos, Gwendolyn Graham, Catherine Wood and Joanne Dennehy); Black Widows (Mary Ann Cotton, Catherine Flannagan, Margaret Higgins, Belle Sorenson Gunness, Dagmar Overbye, and Dorothea Punete); the Caring Profession (Amy Archer Gilligan, Genene Jones, and Beverly Allitt); and finally Sadistic Killers (Countess Bathory, Daria Saltykova, Rose West and Dana Sue Gray). Properly researched, superbly edited and eminently readable this soon to be classic book of wicked women is a must read for anyone interested in what makes women kill and the whole concept of Battered Spouse Syndrome. This is an altogether thoroughly enjoyable read.

the Oklahoma City bombing, Eric Harris and Dylan Klebold, two heavily armed students who opened fire at Columbine High School, killing 13 students, and Brenda Spencer, a rare instance of a female mass murderer, who shot dead eleven junior high classmates "because," she said, "I don't like Mondays." Eight pages of black-and-white photographs are included.

### *Sustainability and Management*

Sep 10 2020 In the wake of the 1987 Brundtland Report, sustainable development has become key to the management systems within businesses, and a means by which companies can increase their long-term value. Being a 'sustainable company' increasingly means 'staying alive in business' and has become a necessity for all kinds of enterprises, from the micro-sized to global corporations. In more recent years, many companies, and indeed governments, have looked at sustainability as a means to combat the multiple challenges of environmental

accidents, global warming, resource depletion, energy, poverty and pollution. However, being sustainable or maintaining sustainability is not an easy task for a company's management function. It needs continuous support and engagement from the board, the executive management, staff and other stakeholders alike.

Additionally, it brings extra costs to the company in terms of hiring trained staff, organising continuous training in the company, publishing sustainability reports and subscribing to a rating system. Sustainability must be nourished by a company's board as well as by all of its departments, such as accounting, marketing and human resources. By the same token, it is not enough for a company simply to declare itself a 'sustainable business' or rely on past measures and reputation; sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports.

planet as we know it extinct. We consider the few who live in fear of such scenarios to be alarmist or even paranoid. But Worst Cases shows that such individuals—like Cassandra foreseeing the fall of Troy—are more reasonable and prescient than you might think. In this book, Lee Clarke surveys the full range of possible catastrophes that animate and dominate the popular imagination, from toxic spills and terrorism to plane crashes and pandemics. Along the way, he explores how the ubiquity of worst cases in everyday life has rendered them ordinary and mundane. Fear and dread, Clarke argues, have actually become too rare: only when the public has more substantial information and more credible warnings will it take worst cases as seriously as it should. A timely and necessary look into how we think about the unthinkable, Worst Cases will be must reading for anyone attuned to our current climate of threat and fear.

KEROUACKING About The LEGAL LANDSCAPE Feb 25

2022 Actual cases from the book: • Boomerang unexpectedly returned and smacked you in the face? This is America, not Australia. We got you covered! • Train whistled at you and caused you tinnitus? It's a disability, file a claim! • Horse emptying his bowels on your lap? That's an "impact" and if the horse can't pay, its owner surely can! • Bought a pair of binoculars? Looked into the sun and hurt your eyes? Mislabeled, it's as clear as daylight! • Stole a gun and shot yourself? Worry not, you're technically unsophisticated and under aged too! • Are you too short to fly a Boeing 747? It's a handicap. Also a discrimination and let's see if we can shrink that bird! • Got a permanent erection? It must be your motorcycle, or the seat, or both! • Dead fly in bottled water? Head to court, even if you didn't drink the water! • Refused school admission seven times in a row? That's academic malpractice, we can help! A collection of 170 of the most unusual court cases from

around the world. Compilation of outrageous, unusual and infamous court cases coupled with witty judicial opinions. Each case is a story by itself with references, including a link to the original court documents. E-book readers can simply tap on the link provided with each story and they can read the case, as it was filed in the courts. Print editions also have the links provided, however, they have to type the URL into their web browser, which takes them to the book's dedicated web-site.

**Now That's Funny!** Mar 05 2020 Every year, Reader's Digest readers send in tens of thousands of jokes and funny anecdotes, in their quest for a \$100 check and, as an extra benefit, eternal glory: to have their joke published in the world's best-read magazine. One man is stopping them from their quest. Andy Simmons. It takes a sense of humor. And Andy certainly has that. Not only is he the arbiter of all things funny in Reader's Digest; he is their Mark Twain, Bill Cosby, and even their

David Sedaris. In other words, Andy is the guy Reader's Digest turns to whenever they need a funny story all of America can appreciate. He's perfect for the job. Andy takes great delight in the funny and oddball side of everyday life. In *Now That's Funny!*, Andy presents his most popular, funniest writings on all things America, some exclusive and all-new, some taken from the award-winning pages of Reader's Digest. You'll discover the Andy that goes out and tries things. His first-person tales of taking dance lessons, participating in a Revolutionary War reenactment, and even taking stand-up comedy lessons are some of the funniest articles to ever appear in Reader's Digest. Then you discover the Andy that observes America. His roundups of dumb criminals, crazy lawsuits, ridiculous excuses and out-of-touch scientific research will have you roaring with laughter -- and feeling much better about yourself. Then there's Andy, the family man. You'll laugh

at the library

Download Pdf

out loud as he goes in search of his inner macho --or for the next stop on his vacation, if only he can find the directions. And Andy's observations on marriage and fatherhood are as accurate as they are funny.

Finally, there's Andy the jokester. Here are tales from the job of trying to think, act, and be funny every workday, no matter what the dog did this morning on the rug. Tales of his sit-downs with comic legends from Robin Williams to Woody Allen will have you in stitches. Andy also shares his favorite jokes -- many of them too edgy for printing in Reader's Digest! Add it up, and it's a book filled with hundreds of feel-good, laugh-out-loud moments about life in these United States -- exactly the type of reading we need today!

*In A Glass Darkly* Jun 27 2019  
In a Glass Darkly is a collection of five different tales, presented as selections from the posthumous papers of the occult detective Dr. Martin Hesselius. The title is taken from 1 Corinthians 13:12, a deliberate misquotation of the passage which describes

humanity as perceiving the world "through a glass darkly". "Green Tea" - An English clergyman named Jennings confides to Hesselius that he is being followed by a demon in the form of an ethereal monkey, invisible to everyone else, which is trying to invade his mind and destroy his life. Hesselius writes letters to a Dutch colleague about the victim's condition, which gets steadily worse with time as the creature steps up its methods, all of which are purely psychological. "The Familiar"- A sea captain, living in Dublin, is stalked by "The Watcher", a strange dwarf who resembles a person from his past. "Mr. Justice Harbottle" - A cruel judge in the Court of Common Pleas, Elijah Harbottle, finds himself under attack by vengeful spirits, and in a disturbing dream he is condemned to death by a monstrous doppelgänger. The story is set between 1746 and 1748 "The Room in the Dragon Volan" - notable mystery story, in 26 chapters, which includes the theme of premarital

"Carmilla"- A tale of a lesbian vampire, set in Styria, Austria. This story was to greatly influence Bram Stoker in writing Dracula. Joseph Thomas Sheridan Le Fanu (1814 - 1873) was an Irish writer of Gothic tales and

mystery novels. He was a leading ghost-story writer of the nineteenth century and was central to the development of the genre in the Victorian era. M. R. James described Le Fanu as "absolutely in the first rank as a writer of ghost stories".
