Dietary Reference Intakes for Vitamin A, Vitamin K, Arsenic, Boron, Chromium, Copper, Iodine, Iron, Manganese, Molybdenum, Nickel,

Silicon, Vanadium, and Zinc Jun 18 2021 This volume is the newest release in the authoritative series issued by the National Academy of Sciences on dietary reference intakes (DRIs). This series provides recommended intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for individuals based on age and gender. In addition, a new reference intake, the Tolerable Upper Intake Level (UL), has also been established to assist an individual in knowing how much is "too much" of a nutrient. Based on the Institute of Medicine's review of the scientific literature regarding dietary micronutrients, recommendations have been formulated regarding vitamins A and K, iron, iodine, chromium, copper, manganese, molybdenum, zinc, and other potentially beneficial trace elements such as boron to determine the roles, if any, they play in health. The book also: Reviews selected components of food that may influence the bioavailability of these compounds. Develops estimates of dietary intake of these compounds that are compatible with good nutrition throughout the life span and that may decrease risk of chronic disease where data indicate they play a role. Determines Tolerable Upper Intake levels for each nutrient reviewed where adequate scientific data are available in specific population subgroups. Identifies research needed to improve knowledge of the role of these micronutrients in human health. This book will be important to professionals in nutrition research and education.

Killing For Company Jan 26 2022 The definitive story of the Dennis Nilsen case featured in Netflix's *Memories of a Murder: The Nilsen Tapes*, and the book behind ITV's *Des*, starring David Tennant ***WINNER OF THE GOLD DAGGER AWARD FOR CRIME NON-FICTION and THE NUMBER ONE SUNDAY TIMES BESTSELLER*** _____ Dennis Nilsen, who died in May 2018, admitted to killing at least 15 people before his arrest in 1983. This ground-breaking criminal study of his killings was written with Nilsen's full cooperation, resulting in a fascinating - and horrifying - portrait of the man who worshipped death. In February 1983, residents of

Muswell Hill had been plagued by blocked drains. When a plumber was called to investigate, he discovered a large blockage of biological material. To his horror, it appeared to be formed of human flesh and bones. The next day, local resident Dennis Nilsen was arrested. 'Are we talking about one body or two?' a detective asked. Nilsen replied 'Fifteen or sixteen, since 1978. I'll tell you everything.' Within days he had confessed to fifteen gruesome murders over a period of four years. His victims, mostly young gay men at a time when society cared little for them, had been overlooked. Killing for Company is a unique study of a murderer's mind, essential reading for true crime aficionados. _____ 'You really have to read this extraordinary book to get a full flavour of the weirdness of Nilsen and his crimes' SUNDAY TIMES 'A seminal look into the criminal mind' DAILY MAIL 'Brian Masters has given us a full, well-ordered, dispassionate account of Nilsen's life and crimes' THE TIMES 'Without any doubt one of the most remarkable, complete and most humanely informative accounts of a murderer's mind ever achieved... the book is far superior to any previous English book of its kind and deserves to serve as a model for all future attempts in this genre' NEW SOCIETY 'The book is a perceptive and at times coldly brutal assessment of Nilsen's psychology' MIRROR 'A comprehensive and compelling account' FINANCIAL TIMES 'Probably the best thing of its kind since In Cold Blood . . . a classic study in criminal mentality' YORKSHIRE POST 'Killing For Company must stand as one of the most remarkable and accurate accounts ever written of the singular relationship between a mass murderer and a society . . . a bloody masterpiece.' BERYL BAINBRIDGE 'A truly awesome tale, brilliantly told' LITERARY REVIEW 'A meticulous study of the dark intricacies of the human mind' THE BOOKBAG 'Brian Masters can rest assured that the job he undertook with such obvious doubts was one worth doing' SPECTATOR 'Masters has written an extraordinary book, and his achievement has been the ability to recount horrific details without descending to the lurid sensationalism of the instant books and Fleet Street reports' POLICE 'A compelling and remarkable book ... through Masters' fine writing the reader suspends his nausea for the crimes, and concentrates with Nilsen on his motives and himself' THE LISTENER

Modern Practice in Stress and Vibration Analysis Sep 29 2019 Modern Practice in Stress and Vibration Analysis documents the proceedings of the conference on Modern Practice in Stress and Vibration Analysis organized by the Stress Analysis Group of the Institute of Physics at the University of Liverpool, 3-5 April 1989. The Group has been known in the UK for its contribution in providing meetings with an emphasis on application, covering topics which range widely to include modern numerical techniques and advanced experimentation. The volume contains 34 papers presented by researchers at the conference covering a wide range of topics such as the application of the sensitivity analysis method to structural dynamics; passive and active vibration control for use in vibration suppression in spacecraft; analysis of an ultrasonically excited thick cylinder; and the prediction of vibrational power transmission through a system of jointed beams carrying longitudinal and flexural waves. It is hoped that the contributions published in this book will be of value to the broad community of practitioners in stress and vibration analysis whom the Stress Analysis Group exists to serve.

Design of Concrete Structures Feb 12 2021 The 14th edition of the classic text, Design of Concrete Structures, is completely revised using the newly released 2008 ACI (American Concrete Institute) Code. This new edition has the same dual objectives as the previous editions; first to establish a firm understanding of the behavior of structural concrete, then to develop proficiency in the methods used in current design practice. Design of Concrete Structures covers the behavior and design aspects of concrete and provides updated examples and homework problems. New material on slender columns, seismic design, anchorage using headed deformed bars, and reinforcing slabs for shear using headed studs has been added. The notation has been thoroughly updated to match changes in the ACI Code. The text also presents the basic mechanics of structural concrete and methods for the design of individual members for bending, shear, torsion, and axial force, and provides detail in the various types of structural systems applications, including an extensive presentation of slabs, footings, foundations, and retaining walls.

Perspectives on Research Assessment in Architecture, Music and the Arts May 30 2022 Research in the creative fields of architecture, design, music and the arts has experienced dynamic development for over two decades. The research in these practice- and arts-based fields has become increasingly mature but has also led to various discussions on what constitutes doctoral proficiency in these fields. The term 'doctorateness' is often used when referring to the assessment of the production of doctoral research and the research competence of research students, but in architecture and the arts, the concept of doctorateness has not yet attained a clearly articulated definition. The assessment of quality has been practiced by way of supervising, mentoring and the evaluation of dissertations but much less discussed. This book offers perspectives on how to qualify and assess research in architecture, music and the arts. It creates a broader arena for discussion on doctorateness by establishing a framework for its application to creative fields. The book is grouped into three sections and includes contributions from international experts in the various fields working in Australia, Belgium, Brazil, Canada, Norway, Sweden, Switzerland, Spain, the Netherlands and the UK. The first section offers general frameworks for further conceptualising doctorateness in the fields in question. It is followed by a section that describes and discusses various experiences, concerns and visions on the production and assessment of doctoral research reporting from doctoral programmes in different stages of development. The third section includes future-oriented perspectives on knowledge-building processes, and asks how the ongoing,

profound changes in academia could influence the concept of quality in both doctoral process and product. The book presents different perspectives on research assessment practices and developments of relevant criteria in the practice-based and creative fields of architecture and the arts. The contributions propose ways of framing this issue conceptually, show the need for awareness of the specific context and tradition programmes develop and give proposals for various potential trajectories for the future.

London Youth, Religion, and Politics Jul 08 2020 For more than a decade the 'Muslim question' on integration and alleged extremism has vexed Europe, revealing cracks in long-held certainties about the role of religion in public life. Secular assumptions are being tested not only by the growing presence of Muslims but also by other fervent new arrivals such as Pentecostal Christians. *London Youth, Religion, and Politics* focuses on young adults of immigrant parents in two inner-city London areas: the East End and Brixton. It paints vivid portraits of dozens of young men and women met at local cafes, on park benches, and in council estate stairwells, and provides reason for a measured hope. In East End streets like Brick Lane, revivalist Islam has been generating more civic integration although this comes at a price that includes generational conflict and cultural amnesia. In Brixton, while the influence of Pentecostal and traditional churches can be limited to family and individual renewal, there are signs that this may be changing. This groundbreaking work offers insight into the lives of urban Muslim, Christian, and non-religious youth. In times when the politics of immigration and diversity are in flux, it offers a candid appraisal of multiculturalism in practice.
