The Restless Hungarian Jul 08 2020 The Restless Hungarian is the saga of an extraordinary life set against the history of the rise of modernism, the Jewish Diaspora, and the Cold War. A Hungarian Jew whose inquiring spirit helped him to escape the Holocaust, Paul Weidlinger became one of the most creative structural engineers of the twentieth century. As a young architect, he broke ranks with the great modernists with his radical idea of the "Joy of Space." As an engineer, he created the strength behind the beauty in mid-century modern skyscrapers, churches, museums, and he gave concrete form to the eccentric monumental sculptures of Pablo Picasso, Isamu Noguchi, and Jean Dubuffet. In his private life, he was a divided man, living behind a wall of denial as he lost his family to war, mental illness, and suicide. In telling his father's story, the author sifts meaning from the inspiring and contradictory narratives of a life: a motherless child and a captain of industry, a clandestine communist who designed silos for the world's deadliest weapons during the Cold War, a Jewish refugee who denied he was a Jew, a husband who was terrified of his wife's madness, and a man whose personal saints were artists.

Fighting to Serve Jul 28 2019 Discharged in 2002 from the US Army under the provisions of "Don't Ask, Don't Tell," Alexander Nicholson was shocked to learn there was no group advocating DADT's repeal that was reaching out to active military or veterans organizations. Nicholson believed the repeal effort needed spokespersons who understood military culture, who could talk about DADT's impact on those who serve to those who serve and served. Someone like him. From this idea Servicemembers United, the largest organization for gay and lesbian servicemembers, was born. Nicholson and several others who had been discharged under DADT toured the United States, where they spoke at American Legion posts, on radio talk shows, and at press conferences across the South and on both coasts. Surprised at the mostly positive reception that the tour provoked, Nicholson and Servicemembers United were propelled to the forefront of the DADT repeal fight. In time Nicholson became the only named plaintiff in the successful lawsuit that ordered the policy overturned, forcing the US Congress to act. Fighting to Serve gives a no-holds-barred account of the backstage strategies and negotiations, revealing how various LGBT organizations, the Congress, the Pentagon, and the White House often worked at cross purposes. But in the end, it was the pressure brought by active veterans, a court ruling out of California, and a few courageous senators, representatives, and military leaders that brought the destructive policy to an end.

The Research Imagination Feb 12 2021 The idea that science is a blueprint for research, and imagination gives research its life and purpose inspired this comprehensive explanation of research methodology. The authors' decades of experience have revealed that research is a craft requiring judgment and creativity, not simply memorization and application of the rules of science. Whether one is conducting an intimate one-on-one interview or a large-scale examination of an entire society, human imagination and scientific principles of inquiry go hand in hand. To that end, this book emphasizes scientific method, but also acknowledges its critics. It covers a wide variety of data-collection techniques, but presents them as reinforcing rather than competing with one another, thus striking a balance between qualitative and quantitative methods. It is

designed for students and instructors who want a comprehensive treatment of a variety of research techniques with special emphasis on qualitative approaches.
